Waiakea 1942 Lava Flow

Island: Hawaii

Size: 640 acres

Elevational range: 2,980 - 3,400 feet

Year established: 1974

Date surveyed: Not yet surveyed

Description: A recent lava flow being recolonized by young 'ohi'a forest dominates this reserve, providing good opportunities for the study of revegetation on lava flows.

Natural Communities: 2 total, neither rare

RANK	NAME
3	'Ohi'a/Uluhe Montane Wet Forest
3	Pioneer Vegetation on Lava Flow

Native Plants: No data

Native Animals: No data

Management Highlights: No management plans have been drafted for this reserve. Key threats have not been confirmed, but weeds that typically compete with native species on pioneer lava substrates may compromise the quality of this reserve.
