LIST OF CURRENTLY LICENSED PESTICIDES
BY EPA REGISTRATION NUMBER

***** For Informational Use Only *****

*****Viewing of label links requires Adobe Acrobat Reader 7.0 or higher*****

The pesticide products listed are currently licensed for distribution and sale, under the provisions of the Hawaii Pesticides Law (Chapter 149A, Hawaii Revised Statutes), until December 31st of the license period listed. Products not listed should be considered unlicensed and its sale and distribution a violation of the said statutes.

- Product names followed by "(Disc)" indicate that the product is being discontinued and upon expiration, its license will not be renewed.

- Product names followed by "(1)" or "(2)" indicate that the product is being discontinued and upon expiration, its license is to be renewed for an additional 1 or 2 years.

- Product names followed by a single asterisk (*) are classified as RESTRICTED USE PESTICIDES (names are also displayed in upper case).

  RESTRICTED USE PESTICIDES can only be distributed and sold by Licensed Sales Outlets and only to Certified Applicators certified in the appropriate category.

  Note that rule revisions in 2007 have resulted in changes in the RUP classification of a number of products. Products containing 2,4-D (unit sizes greater than a quart), diquat, disulfoton, methomyl (fly baits), etc. have been removed from the State RUP listing, while products containing bromacil, hexazinone, metolachlor, simazine and all chlorine gas products have been added. (See HRS, Administrative Rules, Chapter 66, section 4-66-32 for the revised listing)

THIS LIST IS PROVIDED FOR INFORMATIONAL PURPOSES ONLY AND IS NOT A REPLACEMENT FOR THE LICENSE CERTIFICATE.
