DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labelling. To be used in established aquariums. Before applying, it is recommended you first remove as much algae as possible by cleaning the glass and décor. This allows Marineland Algae Eliminator to be most effective at reducing the remaining algae and inhibiting new algae growth. Remove activated carbon filters for 6-8 hours after dosing.

- Add 1 ml of Marineland Algae Eliminator for every 12 gallons (45L) of aquarium water.
- The bottle cap can also be used for measuring. Fill to the top (10ml) to treat 120-gallons (450L).
- For maximum effectiveness ensure that the aquarium is well aerated.
- Dosage may be repeated every three days until algae is under control. Be prepared to remove dead algae from the aquarium.

ATTENTION: Do not use in aquariums with invertebrates or crustaceans e.g. crabs, shrimp, or crayfish.
