LICENSED

PERIOD **2014-2016** LIC. NO. 8966.1

FIRST AID:

If on skin or clothing:
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15 - 20 minutes.
- Call a poison control center or doctor for treatment advice.

If in eyes:
- Hold eye open and rinse slowly and gently with water for 15 – 20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

If swallowed:
- Call a poison control center or doctor for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by a poison control center or doctor.
- Do not give anything by mouth to an unconscious person.

Hotline number:
- Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may contact the National Pesticide Information Center at 1-800-858-7378 for emergency information.

PRECAUTIONARY STATEMENTS:

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Harmful if swallowed or absorbed through the skin. Avoid contact with eyes, skin or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS:

To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area.

DIRECTIONS FOR USE:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Juicy Roots provides essential hormones needed for accelerated root development. Juicy Roots can be used on cuttings of all types, including both woody and herbaceous species, vegetables, fruit trees and small fruits.

Squeeze a small amount of Juicy Roots into a clean container. Dip the cut end of your cutting into Juicy Roots immediately after removing it from the motherplant. The gel should be applied ¼ inch above the depth you will insert the cutting into the rooting medium. Stick the dipped cutting into a pre-made hole in your rooting medium and firmly press media around the cutting to seal air out. Discard excess Juicy Roots after use.

Make Cloning More Successful, More Efficient, and Hassle Free with Juicy Roots Cloning Gel!

Juicy Roots contains the correct concentration and specific form of indole-3-butyric acid (IBA) to give your cuttings exactly what they need to enhance early-stage root formation – maximizing clone survival rates. It is also stickier than other cloning gels, helping it to bond better and work more effectively with your cuttings. And instead of cutting and dipping your clones into a messy jar or a plastic tub, like you have to do with other cloning gels, Juicy Roots uses a unique applicator tip that lets you use the entire container – and use the precise amount you need, so nothing goes to waste – without contaminating the gel. As always, you're fully protected using Juicy Roots because our Growers Guarantee ensures your 100% satisfaction.
