ACTIVE INGREDIENT:
Trichloro-s-triazinetrione....95.0%
INERT INGREDIENTS.....5.0%
TOTAL.....100%
Available Chlorine..85%

NET WT. 4 Lbs (1.81 Kg.)

CHLORINATE
CLORINAR

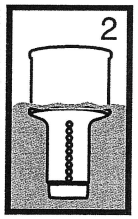
Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle.

POOL STARTUP AND HEAVY BATHER LOAD: At the start of the bathing season, in filled pools, upon filling a pool and after heavy bathing load, superchlorination is necessary. Superchlorination is the addition of two or three times the normal amount of chlorine to oxidize and remove unwanted organic and inorganic material. The end result is the establishment of a chlorine residual of 1.0–1.5 ppm. A chlorinating agent such as KEMKLOR II™, ALL-IN-ONE CHLORINATING GRANULES, SHOCK QUICK™ or SUPER SHOCK QUICK™ should be used for superchlorination. Consult the labels for superchlorination instructions. The pool should not be used during the superchlorination process until the chlorine residual is less than 3.0 ppm.

DIRECTIONS FOR USE OF THE FLOATING CHLORINATOR: It is a violation of federal law to use this product in a manner inconsistent with its labeling.

DANGER: Never mix this concentrated chemical with any other substance except generous amounts of water. See CHEMICAL HAZARDS. **Do Not Use In Spas, Hot Tubs Or In Water Temperatures Above 90°F.**

1. To use this container as a floating chlorinator, cut off the two large knobs nearest the cap (at opposite sides). Locate and remove the small knob which corresponds to the pool capacity in gallons (Fig. 1). Holding the FLOATING CHLORINATOR neck down, lightly shake a few times to level contents. FLOATING CHLORINATOR contains KEM TEK™ SWIMMING POOL 1-INCH CHLORINATING TABLETS (slow dissolving, stabilized and highly concentrated).



2. Place FLOATING CHLORINATOR into the pool water neck down (Fig. 2). Monitor chlorine feed setting using a reliable test kit; chlorine residual should read from 1 to 1.5 ppm. To increase chlorine residual, cut off the small knob for the next higher pool capacity. As part of routine maintenance, superchlorinate regularly using chlorine products such as KEMKLOR II™ Chlorinating Liquid, SHOCK QUICK™ or SUPER SHOCK QUICK™ Adjust pH as needed with pH PLUS™ or pH MINUS™ keeping it between a 7.2 to 7.6 reading. To minimize chlorine consumption, add STABILIZER CONDITIONER as needed to give a concentration of 30 ppm. Follow the instructions provided on these products' labels.

3. FLOATING CHLORINATOR tilts when empty.

PRECAUTIONARY STATEMENTS • HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: CORROSIVE: Causes irreversible eye damage and skin burns. May be fatal if absorbed through skin. May be fatal if inhaled. Do not breathe dust or spray mists. Irritating to nose and throat. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield, protective clothing and rubber gloves when handling this product. Wash thoroughly with soap and water after handling and before eating, drinking or using tobacco. Remove contaminated clothing and wash before reuse.

STORAGE AND DISPOSAL: STORAGE: Keep product in tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. In case of decomposition, isolate container in open area, if possible and flood with large amounts of water. DISPOSAL: IF EMPTY: Nonrefillable container. Do not reuse or refill this container. Place in trash or offer for recycling if available. IF PARTLY FILLED: Call your local solid waste agency for disposal instruction. Never place unused product down any indoor or outdoor drain.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms.

PHYSICAL OR CHEMICAL HAZARDS: STRONG OXIDIZING AGENT. WILL BURN WITH THE EVOLUTION OF CHLORINE AND EQUALLY TOXIC GASES. CONTACT WITH WATER SLOWLY LIBERATES IRRITATING AND HAZARDOUS CHLORINE CONTAINING GASES. DECOMPOSES AT 460°F to 480°F WITH LIBERATION OF HARMFUL GASES.

Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion.

IN CASE OF FIRE, if possible isolate container in open air or well ventilated area. Flood with large volume of water.

IN CASE OF CONTAMINATION OR DECOMPOSITION, do not reseal container.place unused product down any indoor or outdoor drain.

NOTE: Do not allow direct contact of the contents of this product on the following surfaces: vinyl, metallic, fiberglass, painted or colored plaster. Product will bleach color out.

FIRST AID	
If In Eyes	**Hold eye open and flush with plenty of water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor immediately for treatment advice.**
If on Skin or Clothing	**Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor immediately for treatment advice.**
If Inhaled	**Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration preferably mouth -to- mouth if possible. Call a poison control center or doctor immediately for treatment advice.**
If Swallowed	**Call a poison control center or doctor immediately for treatment advice. Promptly drink large quantity of water if able to swallow. DO NOT induce vomiting unless told to do so by poison control center or doctor. Do not give anything by mouth to an unconscious person.**

Have the product container or label with you when calling poison control center or doctor, or going for treatment.
