Scotts®

GRUBEX®

SEASON-LONG GRUB CONTROL

APR 14 2004

White grubs can cause extensive damage to turf by feeding on grass roots. Affected turf turns yellow, then brown, and is easily pulled up in pieces with your hands.

Mole crickets can seriously damage lawns by their tunneling activity. Some species also feed on the grass roots as well.

ONE APPLICATION STOPS GRUBS ALL SEASON LONG!

GrubEx works best when applied before grubs and mole crickets hatch. The active ingredient will remain in the root zone of the turf until the eggs of grubs or mole crickets hatch. These newly hatched insects are highly susceptible to GrubEx and are killed before they become large enough to cause turf damage.

KEY PRODUCT FACTS

What GrubEx does	• Scotts GrubEx prevents turf damage by killing grubs and mole crickets when they are newly hatched, before they can cause damage. • For residential use on lawns and landscaped areas. • DO NOT use in vegetable gardens.
Coverage	Treats up to 5,000 sq.ft. (3,775 sq. ft. for mole crickets)
Directions for use	It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read all directions for use before using.
Controls	**Regular Rate** White Grubs (Larvae of Japanese beetles, oriental beetles, chafers, Asiatic garden beetles, May or June beetles, and black Turfgrass ataenius) **Heavy Rate** Mole Crickets (lawn application)
When to apply	Works best when applied before grubs and mole crickets hatch. For best results, apply as follows: • White grubs – apply once, anytime from April through mid-August. • Mole crickets (lawn application) – In Florida, apply once from early April through early May. Elsewhere, apply once from mid-May through mid-June. Your local County University Extension Office can be consulted for the best application timing in your area. Be sure that you describe the product you are using when seeking such advice. DO NOT apply GrubEx when turf areas are waterlogged. The product may not work effectively under these conditions.
How much to apply	For control of grubs, GrubEx should be applied at the rate of 2.87 pounds per 1,000 square feet. For mole cricket control (lawn application), apply 3.8 pounds per 1,000 square feet. Use the table below as a guide for applying the proper rate of GrubEx. However, the application rate can vary depending on the speed of application and the condition of the spreader. For best results, use a normal, steady pace when applying in order to obtain accurate, even application.
How to apply to lawns	Using either a drop- or rotary-type spreader, apply GrubEx uniformly over the area being treated. Avoid the use of spreaders that may apply the product in narrow, concentrated, or uneven bands. Calibrate your spreader according to the manufacturer's directions to ensure the proper amount of GrubEx is applied. Check frequently to be sure the spreader is working properly and spreading granules evenly.

Spreading Tips: Apply header strips. Then apply product in longest direction of lawn.

Spreader Settings

Spreader	Regular Rate Covers 5,000 sq. ft.	Heavy Rate Covers 3,775 sq. ft.	Coverage Tip
Rotary Spreaders			
Scotts SpeedyGreen® (1000, 2000, 3000 series) & EdgeGuard®	3 1/4	4	Make each pass about 5 feet from the previous pass.
Scotts EasyGreen®	25	25 1/2	Make each pass about 30 inches from the previous pass.
Scotts Tractor	3	3 1/2	
Drop Spreaders			
Scotts AccuGreen® (1000, 2000, 3000 series)	5 1/4	5 3/4	Overlap wheel marks to ensure uniform coverage.
Scotts PrecisionGreen®	4	4 1/2	
Hand-Held Spreaders			
Scotts Handy Green® II, Easy® Hand-Held	2	3	Recommended for landscape areas. Make each pass about 5 feet from the previous pass.

After applying to lawns	GrubEx will work best if the lawn is watered thoroughly or if rainfall occurs within 24 hours after application to move the active ingredient through the thatch and down into the soil. Avoid mowing until watering or rainfall has occurred, so that the uniformity of the granules is not disturbed.
Pests controlled in landscape areas	White grubs (including larvae of Japanese beetle, oriental beetle, chafers, Asiatic garden beetle, May and June beetle, and black turfgrass ataenius.)
Application to landscape plantings	(Trees, shrubs, evergreens, flowers, ground covers) Apply as a broadcast treatment to soil, mulch or other substrate. Prior to application remove black plastic from area to be treated to allow water to penetrate into the soil. Permeable weed barriers need not be removed prior to application. NOTE: DO NOT apply GrubEx to vegetable gardens. DO NOT apply GrubEx to waterlogged areas. The product may not work effectively under these conditions.
After applying to landscape plantings	GrubEx will work best if material is worked into the soil around plants or if a thorough watering or rainfall occurs within 24 hours after application to move product down through mulch and into the soil.

PRECAUTIONARY STATEMENTS

KEEP OUT OF REACH OF CHILDREN

CAUTION

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed or absorbed through the skin. Causes eye irritation. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and warm water after handling.

FIRST AID

If swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

NOTE: When calling a poison control center, have this product label accessible. If seeking treatment at an emergency room or doctor's office, bring this product label to show medical personnel. You may call Toll Free 1-800-543-8873 for medical emergency information. Active ingredient: Imidacloprid [*CAS #138261-41-3].

TO PHYSICIAN: No specific antidote is available. Treat the patient symptomatically.

ENVIRONMENTAL HAZARDS

This product is highly toxic to aquatic invertebrates. Do not apply directly to water. Do not contaminate water when cleaning equipment or disposing of equipment washwater.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

STORAGE CONDITIONS: Store in original container in a cool, dry place, out of reach of children, preferably a locked storage cabinet.

DISPOSAL: If Empty: Do not reuse this container. Place in trash or offer for recycling if available.

If Partly Filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.
