FIRST AID

IF SWALLOWED: Immediately call a poison control center or doctor. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give **any** liquid to the person. Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, and then continue rinsing eyes. Call a poison control center for treatment advice.

Have the product container or label with you when calling a poison control center or doctor or going for treatment. For additional information on this pesticide product (including health concerns, medical emergencies or pesticide concerns), you may call 1-888-740-8712.

Kills the following listed insects on contact: American Dog Ticks, Brown Dog Ticks, Deer Ticks, Fleas, Gulf Coast Ticks, Lice, Lone Star Ticks, other Ixodid species, Ticks that may carry and transmit Lyme disease.

PAGE 1
BOOKLET

DefenseCare™ Flea & Tick Spray for Dogs contains a combination of ingredients that stops the flea life cycle and kills other listed insects. The first active ingredient is Nylar®, an insect growth regulator which inhibits development of the immature stages of the flea for 100 days, preventing them from reaching the adult stage. Nylar® is similar to insect growth hormones that occur naturally in insects. The second active ingredient is the botanical insecticide, Pyrethrins, which provides effective knock-down and quick-kill of insects upon direct contact. The third active ingredient enhances the killing activity of Pyrethrins.

The combination of ingredients in DefenseCare™ Flea & Tick Spray for Dogs kills adult fleas, and hatching fleas and flea eggs for 100 days before they grow up to bite. Nylar® continues to kill hatching fleas and flea eggs for 100 days by preventing their development into the adult biting stage.

DIRECTIONS FOR USE:
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

READ ENTIRE LABEL BEFORE EACH USE.

BOOKLET

USE RESTRICTIONS:

THIS PRODUCT IS FOR INDOOR USE ONLY.

USE ONLY ON DOGS. CONSULT A VETERINARIAN BEFORE USING THIS PRODUCT ON DEBILITATED, AGED, PREGNANT OR NURSING ANIMALS.

Not for use in outdoor residential misting systems (indoor or outdoor) or outdoor metered release systems.

DO NOT TREAT DOGS UNDER 6 MONTHS OF AGE WITH THIS PRODUCT.

Do not use in aircraft cabins.

Do not wet articles to point of runoff or drip.

Do not use treated articles until spray has dried.

Application of this product is prohibited directly into sewers or drains, or to any area like a gutter where drainage to storm sewers, storm drains, water bodies, or aquatic habitat can occur. Do not allow this product to enter any drain during or after application.

FOR DOGS: Cover animal's eyes with a hand. Do not spray directly on mouth, nose, or eyes. Spray head, ears, and chest until damp. With fingertips, rub into face and around mouth, nose, and eyes. Then spray from neck to tail, finishing legs last. For best penetration of spray to skin and on heavy-coated animals, direct spray against the natural lay of the hair, spraying the ruffled hair

BOOKLET

directly behind the hand. Make sure the spray thoroughly wets ticks. When used on miniature and toy breeds of dogs, towel-dry the animal after ½ hour if not totally dry. Avoid contact with genitalia. Repeat as required but not more often than once every 7 days (1 week).

FOR PUPPIES OVER 6 MONTHS: Wrap the animal in a towel that has been sprayed lightly with this product. Leave eyes, nose, and mouth exposed. Put some spray on the finger and gently rub around eyes, nose, and mouth area. Keep animal wrapped for 5 to 10 minutes. Fleas may then be removed from the coat by picking or combing. For best results, all dogs should be treated with a similar flea control product such as DefenseCare™ Flea & Tick Spray for Dogs to prevent reinfestation. Do not spray directly on puppies. Avoid contact with genitalia. Repeat as required, but not more often than once every 14 days (2 weeks).

Sensitivities may occur after using any pesticide product on pets. If signs of sensitivity occur, bathe your pet with mild soap and rinse with large amounts of water. If signs continue, consult a veterinarian immediately.
