

CA-IR-29

Ref: Kamoku-Pukele Revised Final EIS, Pages ES-10, Table ES-1.

Does HECO agree that Alternatives 7 and 8 shown on table ES-1 have the least long-term, non-construction-related impacts of the 12 alternatives evaluated in the EIS? If no, explain why.

HECO Response:

HECO does not agree that Alternatives 7 and 8 on table ES-1 have the least long-term, non-construction-related impacts of the twelve alternatives in the table. As shown in table ES-1, Alternatives 7 and 8 are more expensive than eight of the alternatives in the table, based on Present Value costs in 1999 dollars.
