

LOL-HECO-IR-2

Ref: "Power to serve the Downtown area also comes from the Honolulu Power Plant ('HPP'), when it is on line." (HECO Application, page 18).

Question(s):

How many times in the past 10 years has HPP gone off-line for an unscheduled outage?

HECO Response:

Honolulu Power Plant consists of two separate generating units, Honolulu 8 and Honolulu 9.

Over the past 10 years, there have been a total of 91 instances in which one of the generating units has gone off-line due to an unscheduled outage.
