REM Services

Services

- Conduct training
- Identify & develop projects
- Steer ESPC & UESC surveys & designs
- Execute projects
- Obtain grants & incentives
- Perform measurement & verification services
- Review & analyze data
- Conduct energy surveys & walkthroughs
- Provide technical expertise

Tangible Benefits

- 💡 Dollar \$ savings
- 💡 Consumption (kwh) reductions
- 💡 Demand (kw) reductions
- 💡 Energy management services
- 💡 Avoided project & survey costs
 - Catch bad projects
 - Catch bad scope
 - Ensure proper sizing
 - Catch excessive prices
- 💡 Prepare directives, reports & presentations
- 💡 Grants, incentives and other funding

Example Project

High Bay T-5 replacements of HIDs: Replacement of HIDs by T5s, with zone controls, Improves quality of light, reduces kw and kwh, gives operators control of their lights, and offers fast Paybacks with low risk.

Example Project

Bi-level parking lot lights: REMs showed practicality of exterior lights that go to half power when not needed.

*Parking lot lights
At Lot 9, NAVBASE
San Diego are dim
90 – 95% of the
time*

Example Project

Proper sizing of replacement equipment: REMs ensure replacement equipment is properly sized for known requirements, i.e., avoid the “1-for-1 trap”; this often helps the economics of the project

These two 313 kva Motor generator sets are being replaced by two 175 kva units
