# Comparison of Race and Hispanic Origin Data

- **Race and Hispanic origin are two separate concepts in the federal statistical system.**
  - People who are Hispanic may be of any race.
  - People in each race group may be either Hispanic or Not Hispanic.
  - Each person has two attributes, their race (or races) and whether or not they are Hispanic.
- **Overlap of race and Hispanic origin is the main comparability issue.**
  - For example, Black Hispanics (Hispanic Blacks) are included in both the number of Blacks and in the number of Hispanics.

# When You Say: “I Need Demographic Data”

## Key Questions When Using Data:

- For which geographic area?  
Census geography tells us where
- Which demographic characteristic?  
Census population and housing data tells us how many
- For which year?  
Census 2000 or other decennial census

# Census Geography: Two Broad Categories

- **Legal and Administrative Entities**

Geographic areas that originate from legal action, treaties, statutes, ordinances, resolutions, or court decisions. Examples: States, Counties, Incorporated Places, Amer. Indian Reservations, Hawaiian Home Lands, Congressional Districts, Voting Districts, ZIP Codes

- **Statistical Entities**

Areas that evolve from practice, custom, usage, or need. Specific examples: Metropolitan Statistical Areas (MSA's), Urbanized Areas, Census County Divisions, Census Tracts, Block Groups, Blocks

# Census Small-Area Geography

Use census small-area geography to delineate:

- **Neighborhoods**
- **Communities**
- **Marketing Areas**
- **Trade Areas**
- **Social Service Delivery Areas**
- **Planning Areas**

# Census Geography

## Census Designated Place

- No legally defined corporate limits (unincorporated)
- Defined by the Census Bureau in cooperation with State, Tribal and local officials
- Identified in data tables by the acronym CDP following the place name
- **All places in Hawaii are Census Designated Places**

# Census Geography

## Census Tract

- **Small, relatively permanent statistical subdivision of a county**
- **Average of 1,000 housing units & 4,000 people**
- **Census tracts are designed to be relatively homogeneous units with respect to population characteristics, economic status, and living conditions**
- **Aggregate census tracts to delineate communities, neighborhoods, social service delivery areas, planning areas, marketing or trade areas within a city or CDP**

# Census Geography

## Block Group

- Subdivision of a census tract
- Block group is the smallest geographic unit for the tabulation of sample data
- Block group consists of all blocks within a census tract with the same beginning number

## Block

- Smallest geographic unit for which the Census Bureau tabulates 100% data
- Many blocks correspond to individual city blocks bounded by streets
- Blocks in rural areas, may include many square miles and have boundaries that are not streets

# Use Data from Summary File 3 and Summary File 4

# Ancestry

## Use SF3 & SF4 in tandem:

- SF3 (tables PCT 15-18) has population totals for 109 ancestry groups and identifies whether ancestries are the first or second reported.
- SF4 provides characteristics data (i.e., table repetitions) for 86 groups with no reference to first or second ancestry.

# Language Spoken at Home

## Use SF3 & SF4 in tandem:

- With a breakdown for age, SF3 (PCT10) has data on *40 different languages* spoken at home (“speak only English” and 39 others).
- SF4 (PCT40) has data on *broad language groups*.

# Place of Birth – Foreign Born

## Use SF3 & SF4 in tandem:

- For the foreign-born population, SF3 (PCT19) has population totals for 125 world regions and countries.
- SF4 (PCT47-48) has only regional totals.
- However, SF4 has considerable data on the foreign-born population by sex.
