

Hawaii Green Building Conference in May 2007!

"Green" building techniques include energy efficiency, improved indoor air quality, green material selection, and sensitive site development. When done right, these techniques can provide a higher level of comfort and health, lower utility bills, and more value to new homes, renovations, and whole communities.

The **2007 Hawaii Build & Buy Green Conference & Expo** will present case studies and updates on the latest in greening approaches, including Hawaii BuiltGreen™, LEED (Leadership in Energy and Environmental Design), ENERGY STAR®, Construction and Demolition (C&D) waste management, and Greening Affordable Housing and Communities. Seminar attendees will be eligible to earn AIA CEUs.

WHO: For building and design industry professionals, engineers, developers, and suppliers, and federal, state and local government agencies.

WHEN: **Tuesday, May 8, and Wednesday, May 9, 2007**

WHERE: **Hawaii Convention Center – Honolulu, Hawaii**

May 8, 2007 (7:30 a.m. – 4:30 p.m.): "Green Communities, Affordable Housing and Renewable Energy Workshop" (with assistance from the U.S. Department of Housing & Urban Development): Designing, building, and financing green communities; green affordable housing; Zero Energy Homes; and renewable energy in Hawaii

May 9, 2007 (7:30 a.m. – 4:30 p.m.): Expo with Table Top Exhibits; and Seminars with THREE tracks of concurrent sessions:
