GENERAL INFORMATION ON CONDOMINIUMS

A condominium is a special form of real property. To create a condominium in Hawaii, the requirements of Hawaii's "Horizontal Property Act" (Chapter 514A, Hawaii Revised Statutes) must be followed.

If you are a typical condominium apartment owner, you will have two kinds of ownership: (1) ownership in your individual apartment; and (2) an undivided interest in the common elements.

Common elements are the areas of the condominium project other than the individual apartments. They are owned jointly by all apartment owners and include the land, either in fee simple or leasehold, and those parts of the building or buildings intended for common use such as foundations, columns, roofs, halls, elevators, and the like. Your undivided interest in the common elements cannot be separated from ownership of your apartment.

In some condominium projects, some common elements are reserved for the exclusive use of the owners of certain apartments. These common elements are called limited common elements and may include parking stalls, patios, lanais, trash chutes, and the like.

You will be entitled to exclusive ownership and possession of your apartment. Condominium apartments may be individually bought, sold, rented, mortgaged, or encumbered, and they may be disposed of by will, gift, or operation of law.

Your apartment will, however, be part of the group of apartments that comprise the condominium project. Study the Declaration, Bylaws, and House Rules. These documents contain important information on the use and occupancy of apartments and the common elements as well as the rules of conduct for owners, tenants, and guests.

Some condominium projects are leasehold. This means that the land or the land, building(s) and other improvements are leased to the buyer. The lease for the land usually requires that at the end of the lease term, the lessees (apartment owner/tenant) deliver their interest in the land to the lessor (fee property owner). The lease also usually requires that the lessees either (1) convey to the lessor the building(s) and other improvements, including any improvements paid for by the lessees; or (2) remove or dispose of the improvements. The leases for individual apartments often require that at the end of the lease term, the lessee deliver to the lessor the apartment, including any improvements placed in the apartment by the lessee.

Operation of the Condominium Project

The Association of Apartment Owners is the entity through which apartment owners may take action with regard to the administration, management, and operation of the condominium project. Each apartment owner is automatically a member of the Association.

The Board of Directors is the governing body of the Association. Unless you serve as a board member or an officer, or are on a committee appointed by the board, your participation in the administration and operation of the condominium project will in most cases be limited to your right to vote as an apartment owner. The Board of Directors and officers can take certain actions without a vote of the owners. Some of these actions may significantly impact the quality of life for all apartment owners.

Until there is a sufficient number of purchasers of apartments to elect a majority of the Board of Directors, it is likely that the developer will effectively control the affairs of the Association. It is frequently necessary for the developer to do so during the early stages of development and the developer may reserve certain special rights to do so in the Declaration and Bylaws. Prospective buyers should understand that it is vitally important to all apartment owners that the transition from developer to owner control be accomplished in an orderly manner and in a spirit of cooperation.

The said fractional common interest are based on the number of Units in the Project and is not based on the relative square footages of the Units or the size of lots. The common interests determine each owner's share of the Project common expenses, provided that the cost of maintaining the limited common elements shall be borne by the owner of the Unit to which the limited common element is appurtenant.

EXHIBIT L

Description of Nonconforming Structures

The general plans and specifications for the Units in the Project have been approved by the City and County of Honolulu Department of Land Utilization and Building Department. At the time the general plans and specifications were approved, the Land Use Ordinance of the City and County of Honolulu allowed two dwelling units to be built upon single subdivided lots bearing R-7.5 residential zoning. Each of the Units in the Project is located together with one other Unit on a R-7.5 residential lot.

On April 28, 1988, the Land Use Ordinance was amended to provide that R-7.5 residential lots could be improved with only a principal single family dwelling and an accessory "ohana" dwelling with a maximum floor area of 700 square feet. The Department of Land Utilization has indicated that this amendment would be enforced against any subdivided R-7.5 residential lot less than 15000 square feet in size. Because the lots upon which Units 1 and 1A, 3 and 3A, 8 and 8A, 16 and 16A, 17 and 17A, 23 and 23A, 24 and 24A, 25 and 25A, 26 and 26A, and 27 and 27A are to be constructed are less than 15000 square feet in size, and because Units 1A, 3A, 8A, 16A, 17A, 23A, 24A, 25A, 26A and 27A have been designated as accessory ohana dwellings, the plans for those Units do not comply with the current provisions of the Land Use Ordinance. Nevertheless, because the general plans for the Project were approved before the amendment to the Land Use Ordinance became effective, all Units will be constructed as described in this Condominium Public Report. However, there is no guaranty that future renovations to any of Units 1A, 3A, 8A, 16A, 17A, 23A, 24A, 25A, 26A or 27A will be approved by the City and County.
