

How to Use the eSlate

The eSlate is a direct record electronic machine that any voter may use though it is provided to allow voters with disabilities, including those who are blind, mobility impaired or lack upper-body dexterity, to vote privately and independently. The eSlate will be in a booth that is wheelchair accessible.

To vote with eSlate

Select your language, if applicable in your jurisdiction

1. Select an English or Spanish ballot by turning the SELECT wheel to highlight your language in red.

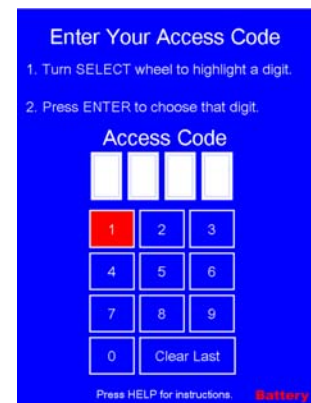

Enter your access code

1. After signing in, as always, you will receive a four-digit access code.

2. Enter the code by turning the SELECT wheel to highlight each number. Press the ENTER button after highlighting each one.

Mark your ballot choices

1. Turn the SELECT wheel to highlight your choice.
2. Press the ENTER button to mark that choice.
3. The box beside your choice will turn red and the highlight bar will automatically advance to the next contest.

How to Use the eSlate (continued)

Review your ballot choices

1. At the end of the ballot, a Ballot Summary Page will appear.
2. Review your ballot closely to make sure you voted as intended.
3. If you've skipped a contest, you will see **no selections**.
4. If you want to make a change, follow the instructions you will find on the Ballot Summary Page.

Press CAST BALLOT button to start the ballot verification process.

1. If the votes shown on the Ballot Summary Page are like you want them, press the CAST BALLOT button.
2. The printer next to the eSlate will begin printing a record of how you have voted.
3. Continue reading on the next page to learn more about verifying your printed record.

You'll know you are finished when...

You see the waving American flag.

CAST BALLOT
⚠ Press only when totally finished voting.

How to Use the eSlate Verifiable Ballot Option

The eSlate is connected to a printer, allowing voters to print and review a paper copy of how they have voted. The printed copy is viewed through a clear cover on the printer that ensures no one can tamper with the ballot.

Those who are blind will hear their ballot summary via headphones, allowing an independent verification. The printer function can also be operated using jelly switches or a 'sip and puff' device for those with limited upper-body mobility.

Each accessible voting booth will contain an eSlate and a secured printer.

To use eSlate Verifiable Ballot Option

Proceed to Paper Verification Page

1. After reviewing the Ballot Summary Page, press CAST BALLOT to advance to the Verifiable Ballot Page.
2. The printer will automatically print the first page of your verification page.
3. Compare the printed page to the page showing on the eSlate screen.

Accept or Reject Page

1. If the pages match and are as you intend, turn the SELECT wheel until "Accept Page" is highlighted in red. Press ENTER.
2. If a second verification page appears, review and follow the same process.

3. If you see something you want to change, turn the SELECT wheel until "Reject Page" is highlighted in red. Press ENTER.
4. Follow the on-screen instructions to go back and make changes. Then repeat the verification process.

Cast Your Ballot

1. After you have verified and accepted all printed pages, press CAST BALLOT to finish voting.

2. You have finished voting when you see the American flag. The printer displays "Ballot Accepted" and scrolls to a blank page to ensure voter privacy.

3. Pressing the **CAST BALLOT** button after you have verified all printed pages completes the voting process and records the ballot. You cannot go back.

How to Use the Accessible eSlate

The eSlate is accessible in six ways.

- ▶ For those who cannot operate the eSlate using the buttons and wheel, special interface devices are available as shown here.
- ▶ For those who cannot see or read the eSlate screen, use the headphones with volume control to hear the ballot.
- ▶ Please also review How to Use the eSlate to learn how the eSlate is operated.

Accessible Features

Those who are blind, visually impaired, or have difficulty reading can listen to the ballot. The SELECT wheel is the trigger to the audio. Turning clockwise moves the listener through the ballot. To hear something repeated, turn the SELECT wheel counterclockwise.

Those using hearing aids with a telecoil mode may use their neckloop rather than the headphones.

The RED jelly switch is the same as the SELECT wheel.

The GREEN jelly switch is the same as the ENTER button.

Voters with quadriplegia can use their sip and puff to move through the ballot. Sip to move through the ballot. Puff to mark your choice.

The accessible eSlate unit is in a wheelchair-accessible booth. If you are not in a chair but need to sit while voting, a chair can be used with the special booth.
