STATE OF HAWAII  
Department of Agriculture  
**ACCEPTED**  
LICENSE NO.  
**6605.1**

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This product is for use in Greenhouses, Nurseries, Shade houses, and Lath houses. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the State or Tribal agency responsible for pesticide regulation.

**AGRICULTURAL USE REQUIREMENTS**

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontaminations, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), and restricted-entry interval. The requirements in this box only apply to uses of the product that are covered by the Worker Protection Standard. Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 24 hours.

**DIRECTIONS FOR USE**

**Preparation of Cuttings:** Select 3-6 inch cuttings from the new growth on vigorous, disease free plants. Using a sharp knife or razor blade, sever the cutting from the parent plant by cutting through the stem at a 45° angle. Do not use shears which crush the tissue. Place stems only in K-L-N, diluted 1-3 tsp/gal of water. Callus formation should start in 7-10 days with roots soon after.

**Oasis cubes, sand, rockwool, vermiculite, etc.:** Soak the cutting in K-L-N diluted 1 tbs/gal for 10-15 minutes then place in growing medium using nonmetallic container only and water to saturation with K-L-N diluted 1-2 tsp/gal. For hard to root cuttings use 1 tbs/gal or Dyna-Gro Root-Gel®.

**Mist Propagation:** Mix 1/2 tsp/gal K-L-N and 1 tsp/gal Dyna-Gro Pro-Tekt® and add to the system's holding tank. Keep the cutting moist at all times.

**Air Rooting:** Dilute K-L-N 1 tbs/gal of water. Saturate medium and place into cut on plant stem. Cover with opaque plastic or foil. Keep moist with K-L-N solution until adequate roots form.

**Transplanting & Dividing Plants:** Drench newly potted or transplanted plants with a solution of 1 tsp of K-L-N, 1 tsp Pro-Tekt® and 1 tsp of any Dyna-Gro plant food per gallon of water. Continue applications of K-L-N until plant is established in the new medium. This will insure vigorous and healthy new growth.

**Warranty:** To the extent consistent with applicable law, the seller's and manufacturer's only obligation shall be to replace such quantity of the product proven to be defective. To the extent consistent with applicable law, neither seller nor manufacturer shall be liable for any injury, loss or damage, direct or indirect, arising out of the use of this product. For more info on product content, associated hazards and personal protection requirements, Material Safety Data Sheets (MSDS) are available by calling 800-396-2476. Peel Here

**PRECAUTIONARY STATEMENTS**

**ENVIRONMENTAL HAZARDS** Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment wash waters.

**PERSONAL PROTECTIVE EQUIPMENT** Some materials that are chemical-resistant to this product are listed below. If you want more options, follow the instructions for Category C on an EPA chemical-resistance category selection chart. All mixers, applicators and other handlers must wear:

- Long-sleeved shirt and long pants;
- Protective eyewear;
- Chemical-resistant gloves such as barrier laminate, butyl rubber, nitrile-rubber, neoprene rubber, polyvinyl chloride or viton; and
- Shoes plus socks

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

**User Safety Recommendations**

Users should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet. Users should remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing. Users should remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

**STORAGE AND DISPOSAL**

Do not contaminate water, food, or feed by storage or disposal.

**PESTICIDE STORAGE:** Store at or below 70°F (21°C). Keep out of direct sunlight. Store in a cool, dry place out of the reach of children. Protect from freezing.

**PESTICIDE DISPOSAL:** Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance. Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

**CONTAINER DISPOSAL:** Nonrefillable container. Do not reuse empty container. Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: (for nonrefillable < 5 gallons) Fill the empty container 1/4 full with water and recap. Shake for 10 seconds. Store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. (for nonrefillable > 5 gallons) Fill the empty container 1/4 full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Store the rinsate for later use or disposal. Repeat this procedure two more times.

Then offer for recycling, if available, or puncture and dispose of in a sanitary landfill, or by incineration, or by other procedures approved by state and local authorities.
