

HASA

jumbo SWIMMING POOL chlorinating tablets

Controls Algae and Bacteria in Swimming Pool Water

KEEP OUT OF REACH OF CHILDREN

DANGER

Active Ingredient: Trichloro-s-triazinetriene: 99.0%
Other Ingredients: 1.0%
Total 100.0%
Available Chlorine: 90.0%

See Additional Precautions and Directions on Back Panel

FIRST AID

IF IN EYES	Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
IF ON SKIN OR CLOTHING	Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
IF INHALED	Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.
IF SWALLOWED	Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by poison control center or doctor. Do not give anything by mouth to an unconscious person.
HOT LINE NUMBER	Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-424-9300 for emergency medical treatment information.
NOTE TO PHYSICIAN	Probable mucosal damage may contraindicate the use of gastric lavage.

HASA JUMBO SWIMMING POOL CHLORINATING TABLETS

READ ENTIRE LABEL BEFORE USING THIS PRODUCT

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS: DANGER: CORROSIVE: Causes irreversible eye damage. Harmful if absorbed through skin, inhaled, or swallowed. Do not get in eyes, on skin, or on clothing. Wear safety glasses, goggles, or face shield, protective clothing, and rubber gloves when handling this product. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove and wash contaminated clothing before reuse. Irritating to nose and throat. Avoid breathing dust.
ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms.
PHYSICAL AND CHEMICAL HAZARDS: STRONG OXIDIZING AGENT: Mix only with water according to label directions. Use clean dry utensils. Do not mix with other chemicals. Do not add this product to any dispensing device containing remnants of any other product. Such use or contamination with moisture, organic matter, or other chemicals may cause a violent reaction leading to the generation of heat, liberation of hazardous gases, or possible fire and/or explosion.

STORAGE AND DISPOSAL

STORAGE: Keep this product dry in a tightly closed container, when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. In case of contamination or decomposition, do not reuse container. If possible, isolate container in open air or well-ventilated area and flood with large volumes of water, if necessary. Do not contaminate water, food, or feed by storage, disposal, or cleaning of equipment.
PESTICIDE DISPOSAL: For product that cannot be used, call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.
CONTAINER DISPOSAL: Non-refillable container. Do not reuse or refill this container. Place in trash or offer for recycling if available.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

SWIMMING POOL WATER

GENERAL INFORMATION – These tablets are manufactured for use in erosion type feeders, wherein they are slowly dissolved as the water flows over the tablets to control algae growth, kill bacteria, and destroy organic contaminants in the swimming pool. Do not throw the tablets directly into the water. Contact with concrete or vinyl walls may result in staining.

NEW POOL OR SPRING START UP – Using a suitable test kit, adjust total alkalinity to 80 - 150 ppm and pH to 7.2-7.8. Superchlorinate (Shock) the pool with a separate fast dissolving granular or liquid chlorinating product to obtain an available chlorine residual of 5-10 ppm. Follow superchlorination or "shock" directions on the label of the selected product. Use pool when the available chlorine residual is in the 1-4 ppm range and the pH is between 7.2-7.8. Entry into treated pools is prohibited above levels of 4 ppm due to risk of bodily harm.
TESTING – Use a reliable test kit with fresh solutions to determine pH, available chlorine residual, and alkalinity levels. Ideal swimming conditions are pH between 7.2 and 7.8, available chlorine residual between 1 and 4 ppm and a total alkalinity between 80 and 150 ppm.
MAINTENANCE – If the directions for use supplied with the chlorinator are missing or unclear, try 2 tablets per 10,000 gallons each 7-10 days. Twenty-four hours after filling the tablet feeder, check the available chlorine with a test kit. If necessary, adjust the feed rate so that the chlorine residual is maintained between 1-4 ppm. If you are unable to maintain a residual after three days, superchlorinate the pool. Disconnect or remove feeder, superchlorinate and reconnect feeder when residual is below 4 ppm. Readjust feed rate to maintain a 1-4 ppm residual. One tablet will provide 5.25 ppm available chlorine per 10,000 gallons of pool water.
SUPER-CHLORINATION – Superchlorination, the addition of several times the normal amount of chlorinating chemical, is necessary to establish an initial chlorine residual in a freshly filled pool, every 7-10 days during the swimming season and after special problems, such as heavy swimming use, dust and wind storms, rain and unusually hot weather. A separate fast dissolving granular or liquid chlorinating product should be used. Follow superchlorination or "shock" directions on the label of the selected product. Re-entry into treated pools is prohibited above levels of 4 ppm due to risk of bodily harm.
ESTIMATING POOL SIZE – To estimate the number of gallons in your pool, use the appropriate formula below (Use measurements in feet only):
Rectangular Pools: Length x Width x Average Depth x 7.5
Round: Diameter x Diameter x Average Depth x 5.9
Oval: Maximum Length x Maximum Width x Average Depth x 5.9
Free Form: Surface Area (Sq. feet) x Average Depth x 7.5
