FIRST AID	
If Swallowed	Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. DO NOT induce vomiting unless told to do so by poison control center or doctor. Do not give anything by mouth to an unconscious person.
If In Eyes	Hold eye open and flush with plenty of water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor immediately for treatment advice.
If on Skin or Clothing	Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor immediately for treatment advice.
If Inhaled	Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration preferably mouth-to-mouth if possible. Call a poison control center or doctor immediately for treatment advice.
Have the product container or label with you when calling poison control center or doctor, or going for treatment. Note to Physician : Probable mucosal damage may contraindicate the use of gastric lavage	

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. A single CLEARVIEW JUMBO TAB, slow dissolving, stabilized will provide 4.7 ppm available chlorine by weight per 10,000 gallons of swimming pool water. Reentry into treated pools is prohibited above levels of 3.0 ppm available chlorine. This product is manufactured for use in erosion-type tablet feeders, wherein the water flows over the tablets slowly, providing a constant chlorine feed rate. Do not place tablets directly into the pool. Contact with concrete and vinyl may cause staining.

CHLORINATION:

Establish an initial chlorine residual: Establish an initial chlorine residual in the 1.0 - 3.0 ppm range with a fast-dissolving, granular product such as CLEARVIEW GRANULAR CHLORINATING CONCENTRATE 56 or a liquid chlorinating product. Follow directions on the labels of these products.

Maintenance of the chlorine residual: When an initial residual has been established, maintain the residual with 1 tablet per 8,000 gallons every 7 - 14 days in a chlorine tablet feeder. The number of tablets used every 7 - 14 days may vary with temperature, wind, pool usage, and feeding method. Test the chlorine residual in the pool water frequently with a reliable test kit. Adjust the tablet feed rate as necessary to maintain the chlorine residual in the 1.0 - 1.5 ppm range.

pH: Measure pH of swimming pool water immediately prior to treatment with this product. Use a reliable test kit. If necessary, adjust and maintain pH within 7.2 - 7.6 range. pH DOWN lowers pH. pH UP raises pH. Follow directions for use on these labels.

STORAGE AND DISPOSAL: Keep product dry in a tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. In case of decomposition, isolate container, if possible, and flood with large quantities of water to dissolve all material before discarding. Non re-fillable container. Do not reuse or refill the container. Offer for recycling if available or securely wrap original container with several layers of newspaper and discard in trash.

PRECAUTIONARY STATEMENTS - HAZARDS TO HUMANS AND DOMESTIC ANIMALS:

DANGER - CORROSIVE. Causes irreversible eye damage and skin burns. May be fatal if absorbed through skin. May be fatal if inhaled. Do not breathe dust or spray mists. Irritating to nose and throat. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield, protective clothing, and rubber gloves when handling this product. Wash thoroughly with soap and water after handling and before eating, drinking, or using tobacco. Remove contaminated clothing and wash before reuse.

Environmental Hazards: This pesticide is toxic to fish and other aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your local State Water Board or the regional office of the EPA.

Physical And Chemical Hazards: Strong Oxidizing Agent. Mix only with water. Use clean, dry utensils. Do not add this product to any dispensing device which contains remnants of any other products. Such use may lead to a violent chemical reaction leading to fire and/or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction with generation of heat, generation of hazardous gases, possible fire and/or explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or in a well-ventilated area. If necessary, flood with large quantities of water and flush to a sanitary sewer.
