ANASPHERE

DIRECTIONS FOR USE
It is a violation of Federal Law to use ANASPHERE in a manner inconsistent with its labeling. Before using ANASPHERE, food products and packaging materials must be removed from the room or area to be treated.

INSPECTION PERFORMANCE IN INSTITUTIONS (Hospitals, Dental Offices, Nursing Homes, and Other Health Care Institutions) and NON-MEDICAL FACILITIES (Households, Schools, Restaurants, Food Services and Other Non-Medical Facilities): At 3 ounces of ANASPHERE per 5 gallons of water use level (450 ppm active) and with a 10-minute contact time, ANASPHERE is bactericidal according to the AOAC Use Dilution Test method on hard non-porous surfaces modified in the presence of 5% organic serum against: Escherichia coli O157:H7, Klebsiella pneumoniae, Listeria monocytogenes, Pseudomonas aeruginosa, Salmonella enterica, Salmonella typhi, Staphylococcus aureus, Community Acquired Methicillin Resistant Staphylococcus aureus – CA MRSA

VIRUCIDAL PERFORMANCE: At 3 ounces of ANASPHERE per 5 gallons of water use level, ANASPHERE was evaluated with a 10-minute contact time in the presence of 5% blood serum and found to be effective against the following viruses on hard, non-porous surfaces: Avian Influenza A virus, Avian Influenza/Turkey/Wisconsin virus, Herpes Simplex Type 1 virus, Herpes Simplex Type 2 virus, Human Coronavirus, Influenza A H1N1 virus, Influenza A2/305 Japan virus, Vaccinia virus.

FOR DISINFECTING HARD, NON-POUROUS SURFACES AGAINST AVIAN INFLUENZA A VIRUS: For use in homes, hospitals, hotels, motels, schools and other non-animal use sites, follow the PREPARATION OF DISINFECTANT/VIRUCIDAL USE SOLUTION directions.

PREPARATION OF DISINFECTANT/VIRUCIDAL USE SOLUTION: For heavily soiled areas, a preliminary cleaning is required. At 3 ounces of ANASPHERE per 5 gallons of water (450 ppm active) to disinfect hard non-porous surfaces. Use solution using a brush, cloth, mop, sponge, auto scrubber, mechanical spray device, coarse pump or trigger spray device or by immersion so as to thoroughly wet surfaces. For spray applications, spray 6-8 inches from surface. Do not breathe spray. Rinse surfaces with use solution. Allow surface to remain wet for 10 minutes. Allow to air dry. Change cloth, sweater or towels frequently to avoid re-deposition of soil. A fresh solution must be prepared at least daily or when use solution becomes visibly soiled.

ANASPHERE is not to be used as a terminal start/finish high-level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. ANASPHERE can be used to pre-clean or decontaminate critical or semi-critical medical devices prior to sterilization or high-level disinfection.

INSTITUTIONAL DISINFECTANT DIRECTIONS (Hospitals, Dental Offices, Nursing Homes, and Other Health Care Institutions): For heavily soiled areas, a preliminary cleaning is required. For disinfecting hard, non-porous inanimate surfaces such as floors, walls, countertops, bathroom areas, lavatories, bed frames, tables, chairs, garage, and other areas, mix 3 ounces of ANASPHERE with 5 gallons of water to disinfect hard, non-porous inanimate surfaces. Apply use solution to surfaces, thoroughly wetting surfaces with a brush, cloth, mop, sponge, auto scrubber or mechanical spray device or by immersion. For sprayer applications, spray 6-8 inches from surface. Do not breathe spray. Rub with brush, cloth or sponge. Treated surfaces must remain wet for 10 minutes. Allow to air dry. Change cloth, sweater or towels frequently to avoid re-deposition of soil. A fresh solution must be prepared at least daily or when use solution becomes visibly soiled.

MOLD AND MILDEW CONTROL: To control the growth of mold and mildew and their odors on hard, non-porous environmental surfaces, apply use solution of 3 ounces of ANASPHERE per 5 gallons of water. Apply by brush, cloth, mop, sponge, auto scrubber, mechanical spray device to thoroughly wet all treated surfaces completely. For spray applications, spray 6-8 inches from surface. Do not breathe spray. Saturate surfaces with use solution. Allow surface to remain wet for 10 minutes. Allow to air dry. Change cloth, sweater or towels frequently to avoid re-deposition of soil. Prepare a fresh solution at least daily or when use solution becomes visibly soiled.

MOLD AND MILDEW PERFORMANCE: At 3 ounces of ANASPHERE per 5 gallons of water use level and with a 10-minute contact time, ANASPHERE was evaluated in the presence of 5% serum and found to be effective against the following on hard, non-porous surfaces: Aspergillus niger.

STORAGE AND DISPOSAL: Do not contaminate food, feed, water, storage or disposal. CONTAINER DISPOSAL: PESTICIDE STORAGE: Non-refillable container. Store only in original container. Do not reuse empty container. Store pesticides away from food, pet food, feed, seed, fertilizers, and veterinary supplies. Keep ANASPHERE under locked storage sufficient to make it inaccessible to children or persons unfamiliar with its proper use. Triple rinse as follows: Fill container ½ full with water and reclose the container. Agitate vigorously and dispose of rinse. Repeat two more times. Wrap container and put in trash or offer for recycling if available.

RESIDUE REMOVAL INSTRUCTIONS: Triple rinse container promptly after emptying. Triple rinse as follows: Fill the container ½ full with water and recap. Shake for 10 seconds. Repeat this procedure two more times.
