

## WINTER TREATMENT CHART:

POOL SIZE IN U.S. GALS.	WINTER LAYUP TREATMENT		
	INITIAL DOSAGE		*MAINT. DOSAGE EVERY 60 DAYS
	CLEAN	VISIBLE ALGAE	
10,000	3/4 Quart	1 1/4 Quarts	3/4 Quart
20,000	1 1/2 Quarts	2 1/2 Quarts	1 Quart
40,000	3 Quarts	5 Quarts	2 Quarts

Covered pools: Only the "Initial Dosage" is required \*60-Day Dosage applies only to uncovered pools

This fall, keep your pool water treated all winter with just Algathec. Using Algathec throughout the non-swimming season not only controls algae and keeps pool water clear, but also allows a quicker start-up in the spring. Winter layup with Algathec is easy, reduces pool filtering time, and provides very effective protection for both covered and uncovered pools from fall to spring.

**BEFORE YOU START:** For best results, adjust pool water pH to between 7.4 and 7.8 with an alkalinity level in the range of 80 to 150 ppm. Further pH adjustment is seldom needed as long as water pH remains between 7.0 and 8.3 (most pools). Remove excess leaves and debris as they accumulate in pool basin to prevent surface stains. If needed, operate pool filtering system to keep surfaces clean from dirt and debris. Algathec requires only minimal pump circulation time as it is unaffected by evaporation, sunlight, or temperature. Winter treatment of clean pools with Algathec usually eliminates sanitizer usage and reduces pool testing during this non-use period.

### USING ALGATEC AS WINTER LAYUP:

At the end of the swimming season (October-November) when water temperature has dropped below 70°, add the correct Algathec "Initial Dosage" for either "Clean Pool" or "Visible Algae" for your pool size. Swimming pools with visible algae should follow the cleanup method before winter layup.

**For Covered Pools:** Only the "Initial Dosage" is required for your pool.  
**For Uncovered Pools:** The "Maintenance Dosage" is required every 60 days until startup.

In general, Algathec is compatible with those chemicals normally used to treat swimming pools and is effective at both acidic and alkaline pH. Do not mix Algathec directly with concentrated dry or liquid chlorine products. Algathec does not change water pH and is non-foaming and non-staining. Swimmers can use swimming pool immediately after treatment.

## CONCENTRATE FOR ALL TYPES OF SWIMMING POOLS

# ALGATEC®

STATE OF HAWAII  
Department of Agriculture

**ACCEPTED**  
LICENSE NO. **8659.3**

*The Easiest Way To Eliminate Algae*  
**Kills and Inhibits Black, Yellow, And Green Algae**

- ✦ Synergizing Action With Chlorine Reduces Shocking
- ✦ Powerful Clarifiers Leave Pool Water Crystal Clear
- ✦ Non-Staining, Non-Foaming, Non-Metalic
- ✦ No Wait, Swim Immediately After Treatment

KEEP OUT OF REACH OF CHILDREN  
**CAUTION:** See Side Panel For  
Additional Precautionary Statements

ACTIVE INGREDIENTS:  
Poly [oxyethylene (dimethyliminio)-ethylene  
(dimethyliminio)-ethylene dichloride] ... 30%

INERT INGREDIENTS: ..... 70%  
100%  
This product contains 2.67 lb. of active  
ingredients and weighs 8.9 lb. per gallon.

**64 FL. OZ. (2 QTS.) 1.89 LITERS**

Made In California

## SUMMER TREATMENT CHART:

POOL SIZE IN U.S. GALS.	SUMMER TREATMENT		
	INITIAL DOSAGE		WEEKLY DOSAGE
	CLEAN	VISIBLE ALGAE	
10,000	1 to 2 Cups	1 Quart	1/2 to 1 Cup
20,000	2 to 4 Cups	1 1/2 - 2 Quarts	1 to 2 Cups
25,000	3 to 5 Cups	2 1/2 - 3 Quarts	2 1/2 to 3 Cups

NOTE: Use Higher Weekly Dosage for Heavily Used Pools

**DIRECTIONS FOR USE:** It is a violation of Federal Law to use this product in manner inconsistent with this labeling.

Algathec's polymers effectively keep water clear by removing and controlling green, blue-green, yellow, and black type algae. Algathec improves water quality and has a synergistic action that is compatible with all types of sanitizers, other scale inhibitors, and metal or non-metal algaecides normally used to treat pools.

**BEFORE YOU START:** The most effective use of Algathec to keep water clear and to remove and control all types of algae growths in swimming pools is best achieved when pool equipment has been checked and is working properly. If needed, backwash filter according to proper procedures. Adjust water pH and balance to maintain a pH level of 7.2 to 7.6. Test chlorine (or other sanitizer) level in pool water and maintain product treatment residual as recommended.

### USING ALGATEC IN SUMMER:

**MAINTENANCE:** To maintain water clear and algae free, add the proper Algathec initial dosage under "Clean Pool" for your pool size. Thereafter, the addition of Algathec "Weekly Dosage" not only will keep water clear but may reduce chlorine consumption up to 65%. Weekly Algathec dosages also provide easier maintenance of pool water.

**CLEAN UP:** For maximum effectiveness pools containing heavy algae growth should be cleaned of excess debris. Disperse proper Algathec dosage under "Visible Algae" directly to pool water. Always use maximum "Visible Algae" dosage for yellow or black type algae. Superchlorinate or shock treatments further enhance Algathec's removal of algae. Operate pump during algae clean-up period to ensure distribution. Brush dead algae (specially yellow) from pool surfaces for more effective removal. Use wire brush to frequently scrub black algae.

## PRECAUTIONARY STATEMENTS: HAZARDS TO HUMANS AND DOMESTIC ANIMALS

**CAUTION:** Harmful if swallowed. Avoid contact with skin, eyes and clothing.

**FIRST AID:** *IF SWALLOWED:* Call a Poison Control Center or doctor immediately. Have person sip a glass of water if able to swallow. Do not induce vomiting unless advised by poison control center or physician. *DO NOT* give anything by mouth to an unconscious person. *IF ON SKIN OR CLOTHING:* Take off contaminated clothing. Rinse skin with water. *IF INHALED:* Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth to mouth if possible. *IF IN EYES:* Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. call the poison control center or doctor for further treatment advice. Have the product container or label with you when calling or going for treatment.

**ENVIRONMENTAL HAZARDS:** This pesticide is toxic to fish. Keep out of lakes, streams, and ponds. Permits may be required for discharges containing this pesticide into lakes, ponds and public water. For guidance, contact the regional office of the Environmental Protection Agency.

**STORAGE & HANDLING:** Keep container closed when not in use. Spills may be slippery. Mop up product with clean water. Do not blend directly with other pool chemicals.

**DISPOSAL:** Do not reuse empty container. Triple rinse container and dispose in trash.
