GREEN LIGHT [®]

READY-TO-USE

House & Yard Insect Control

Controls Ants, Aphids, Carpenter Ants, Crickets, Fleas, Gnats, Houseflies, Japanese Beetles, Mosquitoes, Roaches, Scorpions, Silverfish, Spiders, Ticks and Whiteflies

Up to 120 Days
For Indoor and Outdoor Use

ACTIVE INGREDIENT:
Deltamethrin [(s)-alpha-cyano-3-phenoxybenzyl (1R,3R)-3-(2,2-dibromovinyl)-2,2-dimethyl cyclopropanecarboxylate] 0.02%

OTHER INGREDIENTS 99.98%

Total 100.00%

KEEP OUT OF REACH OF CHILDREN
CAUTION See Booklet For Additional Precautionary Statements

Net Contents 128 FL OZ (1 GAL) 3.785L

Water-Based

40801
Form 7023-B

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS & DOMESTIC ANIMALS

CAUTION: Contact with product may result in transient tingling and reddening of the skin. Avoid contact with skin or clothing.

FIRST AID

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. **IF IN EYES:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

HOTLINE NUMBER: Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact **(800) 892-0099** for general information and/or medical information.

ENVIRONMENTAL HAZARDS: To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area.

This product is extremely toxic to fish and aquatic invertebrates. This product is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds while bees are actively visiting the treatment area.

PHYSICAL OR CHEMICAL HAZARDS: Do not apply this product in or on electrical equipment due to possibility of shock hazard.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

PRODUCT INFORMATION

HOW IT WORKS

Please see specific uses under the target-use categories on label.

WHERE TO USE

Use indoors and outdoors on ornamental shrubs and flowers.

HOW TO USE

- Hold container upright.
- Do not spray up into air.
- Apply to surfaces only as a spot and crack & crevice treatment.
- Turn spray nozzle to "on" position.
- Hold approximately 12 inches from surface to be sprayed.
- Squeeze trigger to spray until surface is slightly moist.

STORAGE AND DISPOSAL

PESTICIDE STORAGE: Store in original container. Store in a locked storage area out of reach of children and pets. Protect from freezing (store above 32°F). If freezing occurs, allow product to thaw and shake well before using. Freezing does not adversely affect the product.

PESTICIDE DISPOSAL AND CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill this container. **If empty:** Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

GENERAL INFORMATION

Hold container upright. Do not spray up into air. Apply to surfaces only as a spot and crack and crevice treatment. Turn spray nozzle to "on" position. Hold approximately 12 inches from surface to be sprayed. Squeeze trigger to spray until surface is slightly moist. Green Light® House & Yard Insect Control's long-lasting action keeps on killing for up to 120 days. Contact kill gives you immediate results when spraying insects directly, while residual activity kills insects when they return to treated areas. *Green Light House & Yard Insect Control* is intended to be used in and around residences and their immediate surroundings such as (but not limited to): **apartments, atriiums, attics, basements, bathrooms, decks, dens, driveways, garages, homes, kitchens, living rooms, patios, play rooms, porches, storage areas and utility rooms.** Do not use in commercial food handling establishments, restaurants, or other places where food is commercially prepared or processed.

INDOORS

Cockroaches (including adult and immature stages of both non-resistant and organophosphate and carbamate resistant strains), **Ants, Boxelder Bugs, Centipedes, Crickets, Dermestids, Firebrats, Fleas, Palmetto Bugs, Silverfish, Sowbugs (Pillbugs), Ticks and Waterbugs:** Apply as a spot and crack and crevice treatment to areas where these pests crawl and hide, especially in hidden areas around sinks and storage areas, behind baseboards, around doors and windows, behind and under refrigerators, cabinets, sinks and stoves, the underside of shelves, drawers, bookcases and similar areas. Cover all food handling surfaces and cover or remove all food and cooking utensils or wash thoroughly after treatment. Exposed food should be covered or removed. **Ants:** Spray ant trails and around doors and windows and other places where ants enter the house. **Carpenter Ants:** For effective control, locate and treat nests and surrounding areas. Apply around doors and windows and other places where ants enter premises and where they crawl and hide. Spray into infested wood through existing openings. **Ticks and Fleas on Surfaces:** Remove pet bedding and destroy or clean thoroughly. Spray pet resting quarters. Adult fleas and larvae contacted by spray will be killed. Put fresh bedding down once spray has dried. Do not spray animals directly. For best results, pets should be treated with an appropriate flea and/or tick control product registered for use on pets before allowing them to return to the treated area. Spray rugs and carpets where infestations are bad. Delicate fabrics should be tested for staining in an inconspicuous area prior to use. **Spiders:** Apply along and behind baseboards, to window and door frames, corners, pipes, storage localities, attics, crawl spaces, and other areas over which these pests may crawl. **Centipedes, Ground Beetles, Pillbugs, Scorpions and Ticks:** Apply around doors and windows and other places where these pests may enter premises. Treat baseboards, storage areas, and other locations where these pests are found.

FLYING INSECTS: House Flies, Gnats, Mosquitos and Small Flying Moths: Spray localized resting areas, such as under eaves, porches, inside surfaces of window and door frames, surfaces around light fixtures and cords, railings, etc., and anywhere these insects may rest. Insects coming to rest on treated surfaces will be killed.

HORSE STABLES: To control *stable flies, horn flies, house flies, face flies, horse flies, deer flies, mosquitoes and gnats:* Apply thoroughly to surfaces until wet. Insects coming to rest on treated surfaces will be killed or repelled. Do not spray animals or humans, or apply to animal feed or watering equipment.

OUTDOORS

Point sprayer away from face. Hold sprayer on a slight downward angle, approximately 12 inches from surface to be sprayed. Spray with wind if breeze is blowing. Do not contaminate fish ponds or apply directly to water.

PESTS ON OUTSIDE SURFACES OF BUILDINGS: For control of building infestation of *Ants, Clover Mites, Crickets and Sowbugs*

(Pillbugs). Spray foundation of building where insects are active and may find entrance up to a height of 2 to 3 feet. Apply to outside surfaces of buildings where insects tend to congregate. Spray areas include (but are not limited to) screens, window frames, eaves, porches, patios, garages, and refuse dumps. **CRAWLING INSECTS: Ants, Cockroaches (including Asian Cockroaches), Centipedes, Crickets, Mole Crickets, Waterbugs and Silverfish.** Spray infested surfaces of patio or picnic area. Also spray legs of tables and chairs. **Ants:** Spray freely around ant trails and hills. Spray around nests hidden under steps, brickwork, concrete, etc. Break apart accessible nests and spray freely on and around debris. **Lone Star Ticks, Dog Ticks, Crickets and Fleas:** Apply thoroughly to infestation in bushes, grass or weeds. **Wasps, Hornets, Yellow Jackets and Bees:** Spray nests and other surfaces where bees may rest. Aim spray at nest openings. Applications should be made late in the evening when insects are at rest.

FLYING INSECTS: House Flies, Gnats, Mosquitos and Small Flying Moths: Spray outside surfaces of window and door frames and other areas where these pests may enter the home. Also spray localized resting areas, such as under eaves, porches, surfaces around light fixtures and cords, railings, etc. where these insects may rest. Insects coming to rest on treated surfaces will be killed.

TERMITES, CARPENTER ANTS AND CARPENTER BEES (for localized control only). Apply *Green Light House & Yard Insect Control* to voids or channels in damaged wood of a structure, or to cracks, crevices and spaces in and between wooden portions of a structure or between wood and the foundation, in locations vulnerable to attack such as crawl spaces. For termites, the purpose of such applications is to kill workers or winged forms which may be present in the treated areas at the time of application. Not recommended as sole protection against termites. For active infestations, get a professional inspection. Such applications are not a substitute for mechanical alteration, soil treatment or foundation treatment but are merely a supplement. For severe termite infestation, contact a professional pest control operator in your area.

HOUSE PLANTS: To control *Aphids, Japanese Beetles, Lace Bugs, Leafminers, Mealybugs, Mites and Spider Mites* on houseplants. Prior to spraying, remove plants from living and eating areas. Put in an area not likely to come in contact with children, pets or food. Plants can be returned to original location when leaves dry. If plants cannot be moved, cover or remove exposed food and food handling surfaces. Avoid spraying surrounding areas. Apply spray to upper and lower surfaces of foliage. Avoid wetting blossoms, if possible.

CONTROL OF ORNAMENTAL GARDEN INSECTS: For use on roses, dahlias, asters, African violets, azaleas, begonias, camellias, carnations, chrysanthemums, delphiniums, dogwood, English ivy, euonymus, fuchsia, geraniums, crassula, grape vine, Kentia palm, laurel, marigolds, rhododendrons, rubber plants, snapdragons, wandering Jews, zinnias and other ornamentals to kill *Japanese Beetles* hit by spray, as well as *Whiteflies, Aphids, Armyworms, Lace Bugs, Mealybugs, Exposed Thrips, Spiders, Clover Mites, Spider Mites and Leafminers.* May be used on plants, as well as a multi-purpose spray in small ornamental gardens and for spot treatments to prevent insects from spreading into large garden areas. When spraying plants, do not operate closer than 18 inches. Use a sweeping motion. Be cautious about wetting tender foliage, young plants, and new growth. Do not spray plants when temperatures exceed 90F. **DO NOT apply to vegetable plants or other plants used for food.** Spray insects directly whenever possible.

WARRANTY: Seller warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated on the label when used in strict accordance with the directions. Seller makes no other express nor implied warranty of merchantability or fitness for a particular purpose or any other express or implied warranty.

NOTICE: Buyer assumes all responsibility for safety and use not in accordance with directions.
