DIRECTIONS FOR USE
 It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
READ THIS LABEL: Read this entire label and follow all use directions and use precautions.
IMPORTANT: Do not expose children, pets or other non-target animals to rodenticides. To help prevent accidents:
 1. Store product not in use in a location out of reach of children and pets.
 2. Apply bait in locations out of reach of children, pets, domestic animals and non-target wildlife, OR in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hofed livestock, raccoons, bears, other potentially destructive animals or in areas prone to vandalism.
 3. Dispose of product container, unused, spoiled and unconsumed bait as specified on this label.
USE RESTRICTIONS: This product may be used to control House Mice. Do not place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food.
URBAN AREAS: May be used indoors and in transport vehicles (ships, trains, aircraft). May be used outdoors within 15 feet of homes, industrial, commercial, agricultural and public buildings and similar man made structures.
NON-URBAN AREAS: This product may only be used inside of homes and agricultural buildings.
SELECTION OF TREATMENT AREAS: Determine areas where mice will most likely find and consume the bait. Generally, these are along walls, by gnawed openings, in corners and concealed places, between floors and walls, or in locations where rodents or their signs have been seen. Remove as much alternative food as possible.
APPLICATION DIRECTIONS:
 Use one bait pack per placement. Two packs may be placed at points of very high mouse activity. Space placements 8 to 12 feet apart. Maintain a constant supply of fresh bait for 15 days or until signs of mouse activity cease. Replace contaminated or spoiled bait immediately. Collect and dispose of all visible dead animals and leftover bait properly. To discourage reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation occurs, repeat treatment. For a continuous infestation, set up permanent bait stations and replenish bait as needed.
 Do not tear open the pack - rats and mice will chew through the wrapper to get at the bait.

STORAGE AND DISPOSAL:
STORAGE: Store in original container in a dry place inaccessible to children and pets.
DISPOSAL: If empty: Do not reuse this container. Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.

PRECAUTIONARY STATEMENTS
HAZARD TO HUMANS AND DOMESTIC ANIMALS
CAUTION
 Keep away from children, domestic animals and pets. May be harmful or fatal if swallowed or absorbed through the skin because it may reduce the clotting ability of blood and cause bleeding. Do not get in eyes, on skin or on clothing. Wash arms, hands and face with soap and water after applying and before eating and smoking.

FIRST AID
 Have this label with you when obtaining treatment advice. If swallowed: Call a poison control center or doctor immediately for treatment advice. Do not induce vomiting unless told to do so by the poison control center or doctor.
NOTE TO PHYSICIAN OR VETERINARIAN: This product may reduce the clotting ability of the blood and cause hemorrhaging. If poisoning occurs, intramuscular and oral administration of Vitamin K1 is antidotal as indicated in bishydroxycoumarin overdoses. Repeated doses may be needed for up to two weeks (based on monitoring of prothrombin times). In severe cases, blood transfusions may be necessary.

ENVIRONMENTAL HAZARDS
 This product is toxic to fish and wildlife. Do not apply directly to water.

Satisfaction guaranteed or your money back.
