FIRST AID:
IF SWALLOWED: Immediately call a poison control center or doctor. • Do not induce vomiting unless told to do so by a poison control center or doctor. • Do not give any liquid to the person. • Do not give anything by mouth to an unconscious person. **IF ON SKIN OR CLOTHING:** Take off contaminated clothing. • Rinse skin immediately with plenty of water for 15-20 minutes. • Call a poison control center or doctor for treatment advice. **IF IN EYES:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. • Remove contact lenses, if present, after the first 5 minutes, and then continue rinsing eyes. • Call a poison control center for treatment advice. • Have the product container or label with you when calling a poison control center or doctor or going for treatment. For information regarding medical emergencies or pesticide incidents, call 1-800-740-8772.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Harmful if swallowed or absorbed through skin. Causes moderate eye irritation. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove and wash contaminated clothing before reuse. • **ENVIRONMENTAL HAZARDS:** This product is toxic to fish and other aquatic invertebrates. Do not apply directly to water. Do not contaminate water when disposing of equipment wash waters or rinsate. • **PHYSICAL OR CHEMICAL HAZARDS:** Flammable. Keep away from heat and open flame. Kills adult fleas, flea eggs, ticks and lice. FastAct™ Flea & Tick Spray for dogs and cats contains a combination of ingredients that stops the flea life cycle and controls other listed insects. The first active ingredient is Nylar®, an insect growth regulator which inhibits development of the immature stages of the flea for 100 days, preventing fleas from reaching the adult stage. Nylar® is similar to insect growth hormones that occur naturally in insects. The second active ingredient is the botanical, Pyrethrum, which provides effective knock-down and quick-kill of insects upon direct contact. The third active ingredient enhances the killing activity of Pyrethrum. • The combination of ingredients in FastAct™ Flea & Tick Spray for dogs and cats kills adult fleas and hatching fleas and flea eggs for 100 days before they grow up to bite. Nylar® continues to kill hatching fleas and flea eggs for 100 days by preventing their development into the adult biting stage. FastAct™ Flea & Tick Spray can also be used to kill fleas hidden in carpets, rugs, draperies, upholstery, pet bedding, floor cracks, and cabinets. Occasionally adult fleas may be present in treated areas when reintroduced from infested animals.

DIRECTIONS FOR USE:

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.
READ ENTIRE LABEL BEFORE EACH USE. USE RESTRICTIONS: Do not apply directly to sewers or drains, or to any area like gutter where drainage to storm sewers, water bodies, or aquatic habitat can occur. Do not allow the product to enter any drain during or after application.
USE ONLY ON DOGS AND CATS. • CONSULT A VETERINARIAN BEFORE USING THIS PRODUCT ON DEBILITATED, AGED, PREGNANT OR NURSING ANIMALS. • DO NOT TREAT DOGS UNDER 6 MONTHS OF AGE WITH THIS PRODUCT. • DO NOT TREAT CATS UNDER 7 MONTHS OF AGE WITH THIS PRODUCT.
FOR DOGS AND CATS: Cover animal's eyes with a band. Do not spray directly on mouth, nose, or eyes. Spray head, ears, and chest until damp. With finger tips, rub into face and around mouth, nose, and eyes. Then spray from neck to tail, finishing legs last. For best penetration of spray to skin and on heavy coated animals, direct spray against the natural lay of the hair, spraying the ruffled hair directly behind the band. Make sure the spray thoroughly wets ticks. When used on miniature and toy breeds of dogs or on cats, towel-dry the animal after 1/2 hour if not totally dry. Repeat treatment every 3 months. Avoid contact with genitalia. **FOR PUPPIES OVER 6 MONTHS AND KITTENS OVER 7 MONTHS:** Wrap the animal in a towel that has been sprayed lightly with this product. Leave eyes, nose, and mouth exposed. Put some spray on the finger and gently rub around eyes, nose, and mouth area. Keep animal wrapped for 5 to 10 minutes. Fleas may then be removed from the coat by picking or combing. For best results, all dogs and cats should be treated with a similar flea control product such as FastAct™ Flea & Tick Spray to prevent reinfestation. Do not spray directly on puppies and kittens. Repeat treatment every 3 months. Avoid contact with genitalia. • Sensitivities may occur after using any pesticide product on pets. If signs of sensitivity occur, bathe your pet with mild soap and rinse with large amounts of water. If signs continue, consult a veterinarian immediately.

STORAGE AND DISPOSAL:

Do not contaminate water, food, or feed by storage and disposal.
Pesticide Storage: Store in a cool, dry area. Always store pesticides in the original container. Store away from food and pet food.
Pesticide Disposal and Container Handling: Nonrefillable container. Do not reuse or refill this container. If empty: Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.
