**TO DEODORIZE:** Disinfectant works by oxidation, not  
by masking of odors. Eliminates odors caused by fire smoke, tobacco  
smoke, musty odors, stale cooking odors. Simply spray, fog or wipe on full  
strength and let air dry to provide long-lasting residual deodorizing action. When  
fogging apply 1 quart per 2000 cubic ft. following fogger manufacturer's directions  
for use. Disinfectant must come into contact with the cause of the odor to be  
effective. For pet urine stains in carpet, blot urine as dry as possible. Then  
saturate stain with Disinfectant through carpet pad.

**TO SANITIZE FOOD CONTACT SURFACES:** Staphylococcus aureus (ATCC 6538)  
and Escherichia coli (ATCC 11229) Mix 1 part Disinfectant to 12 parts tap water. For  
glassware, utensils, cookware, and dishware: scrape and pre-wash, then wash  
with a good detergent. Rinse with potable water, then sanitize by immersion in  
Disinfectant for 1 minute (or longer if specified by government sanitary code).  
Place on a rack or drain board to air dry. Do not rinse or wipe. For food contact  
immobile surfaces (food processing equipment, counter tops, tables,  
appliances): remove all gross food particles and soil by cleaning and rinse with  
potable water. Apply Disinfectant by wetting thoroughly and let stand for 1  
minute (or longer if specified by government sanitary code). Let surfaces drain  
and air dry. Do not rinse or wipe.

**TO SANITIZE CARPET:** For synthetic carpet fibers such as nylon, olefin, or  
polypropylene – not intended for use on wool carpet. Test for color  
fastness in an inconspicuous area. Carpet should be clean or free of  
excessive soil before applying. Mix 1 part Disinfectant to 5 parts water.  
Apply by sprayer at a rate of 1.7 gallons per 10 sq. yards (approximately  
22 oz. per sq. yd.). Disinfectant must come into contact with contaminate  
to work. Allow to dwell for 10 minutes. Do not rinse. Use an extraction  
wand and dry stroke carpet to remove excess moisture. Carpet can air  
dry or fans may be used if carpet needs to dry faster.
