**TO CLEAN AND DISINFECT VIRUCIDAL* /
FUNGICIDAL / MOLD AND MILDEW CONTROL**

DIRECTIONS: Wipe hard, non-porous surface with
wipe until surface is visibly wet. Use enough wipes to
keep surfaces visibly wet for 10 minutes. Let air-dry.
If surfaces are extremely dirty, clean first with
another wipe before disinfecting. Discard used wipe
in trash. Do not flush in toilet. Rinse food-contact
surfaces with clean, potable water after disinfecting.
Do not use as a diaper wipe or for personal cleansing.
(Note: Not recommended for unpainted wood, natural
marble or brass.)

For fungicidal activity: TOTAL HOME Disinfecting
Wipes are an effective fungicide against Trichophyton
mentagrophytes [the athlete's foot fungus] in areas
such as locker rooms, dressing rooms, shower and
bath areas, and exercise facilities. This product is a
one-step fungicide.

For mold and mildew: TOTAL HOME Disinfecting
Wipes will effectively inhibit the growth of mold and
mildew and the odors caused by them when applied to
hard, non-porous surfaces. Follow disinfection
instructions. Repeat treatment every seven days, or
more often if new growth appears.

Sanitizing (Deodorizing): To sanitize (deodorize)
hard, non-porous, non-food contact surfaces; wipe
surface, using enough wipes to allow treated surface
to remain wet for 15 seconds for Staphylococcus
aureus (Staph) (ATCC 6538), Klebsiella pneumoniae
(ATCC 4352), and Campylobacter jejuni (ATCC
29428). Let surface dry. For highly soiled surfaces,
clean excess dirt first.

For plastic and painted surfaces, spot test on an
inconspicuous area before use. This product will not
harm most surfaces; including acrylic, sealed
fiberglass and vinyl. Do not use on unpainted wood.
Not for personal cleansing. This is not a baby wipe!
Do not flush in toilet.

This product is for use on hard, non-porous surfaces
not conducive to treatment by immersion or excess
liquid against Avian Influenza A.
