

ClariFly® Larvicide 267

- FOR USE IN SWINE FEEDS AND SUPPLEMENTS AS PART OF AN INTEGRATED PEST MANAGEMENT PROGRAM TO CONTROL FLIES DEVELOPING IN MANURE
- CONTAINS DIFLUBENZURON FOR CONTINUOUS FEEDING DURING THE FLY SEASON
- STOPS THE DEVELOPMENT OF HOUSE FLIES IN THE MANURE OF TREATED SWINE INCLUDING NURSERY, GROW-FINISH AND BREEDING STOCK

ACTIVE INGREDIENT:

Diflubenzuron [CAS# 35367-38-5]..... 2.67%

OTHER INGREDIENTS: 97.33%

Total..... 100.00%

Contains 0.42 ounces (12.12 grams) of diflubenzuron per pound.

**KEEP OUT OF REACH OF CHILDREN
CAUTION**

See additional Precautionary Statements

**PRECAUTIONARY STATEMENTS – HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION**

Harmful if swallowed. Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash hands thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet.

FIRST AID

If Swallowed	<ul style="list-style-type: none"> • Call a poison control center or doctor immediately for treatment advice. • Have person sip a glass of water if able to swallow. • Do not induce vomiting unless told to do so by a poison control center or doctor. • Do not give anything by mouth to an unconscious person.
If in Eyes	<ul style="list-style-type: none"> • Hold eye open and rinse slowly and gently with water for 15-20 minutes. • Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. • Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For additional information on this pesticide product, including health concerns, medical emergencies, or pesticide incidents, you may call 1-800-347-8272, 24 hours per day, 7 days per week.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to aquatic invertebrates. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters or rinsate.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

ClariFly® Larvicide 267 inhibits the development of fly larvae in the manure of treated swine. When fed according to label directions, diflubenzuron prevents the emergence of house flies in the manure of treated swine. Start feeding **ClariFly® Larvicide 267** early in the spring before house flies begin to appear and continue feeding throughout the summer and into the fall until cold weather restricts house fly activity.

This product is not effective against existing adult house flies. When starting a feeding program during the season, it is desirable to use other control measures to reduce the population of existing adult house flies.

In some cases, supplemental house fly control measures may be needed in and around swine barns to control adult house flies which can breed not only in swine manure, but in decaying vegetable matter or silage on the premises. In order to achieve optimum house fly control, use this product in conjunction with other good management and sanitation practices.

The dosage of **ClariFly® Larvicide 267** is proportional to the animal's body weight and must be offered daily throughout the entire house fly season. The following table gives dosage information.

Species	Daily Feeding Rate of DFB AI	
	mg/kg	mg/cwt
Swine - ClariFly® Larvicide 267 may be fed to swine including nursery, grow-finish, and breeding stock with no withdrawal period. Use the higher inclusion rate for lighter weight pigs.	0.20 - 0.30	9.10 – 13.64

ClariFly® Larvicide 267 is a specially formulated granular material for use in swine feeds. It is approved for use in supplements, complete feeds, concentrates, and premixes. It may also be used in liquid feeds when suspension agents are used to maximize the positional stability of the other feed ingredients.

Feed Mixing Directions - 0.20 mg/kg/day – 0.30 mg/kg/day

Use the following formula when mixing swine rations. Use the higher inclusion rate for lighter weight pigs.

For a dosage of 0.20 mg/kg/day:

$$\frac{\text{CWT}}{\text{Consumption (lbs)}} \times 1.5 = \text{lbs of ClariFly® Larvicide 267 per ton of product being manufactured}$$

For a dosage of 0.30 mg/kg/day:

$$\frac{\text{CWT}}{\text{Consumption (lbs)}} \times 2.25 = \text{lbs of ClariFly® Larvicide 267 per ton of product being manufactured}$$

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal. **PESTICIDE STORAGE:** Keep this product in its tightly closed original container. Store in a cool, dry (preferably locked) area that is inaccessible to children and animals. **PESTICIDE DISPOSAL:** Wastes resulting from the use of this pesticide may be disposed of on site or at an approved waste disposal facility. **CONTAINER HANDLING:** Nonrefillable container. Do not reuse or refill this container. Completely empty bag into mixing equipment. Offer for recycling if available, then dispose of empty bag in a sanitary landfill, or by other procedures approved by state and local authorities.

WARRANTY AND LIMITATION OF DAMAGES

Seller warrants that this material conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use and Buyer assumes the risk of any use contrary to such directions. Seller makes no other express or implied warranty of Fitness or of Merchantability, and no agent of Seller is authorized to do so except in writing and with specific reference to this warranty. To the extent consistent with applicable law, Seller's liability for any breach of warranty shall not exceed the purchase price of the material as to which claim is made.
