Batch No.

FORTRESS™ Spot On® for CATS

Three 0.017 fl. oz. pipettes

FORTRESS™ Spot On® for CATS
by the makers of **ADAMS**

Fortress™ Spot On® for Cats contains the active ingredient fipronil that effectively targets fleas, ticks, and chewing lice. Fipronil collects in the oils of the skin and hair follicles, and continues to be released from hair follicles onto the skin and coat, resulting in long-lasting activity.

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. **Do not allow children to apply product.** To prevent injury to you and your pet, read entire label and directions on the package insert before each use. Follow all directions and Precautionary Statements carefully. This product must only be used on cats. Do not use on rabbits or on other animals.

To kill fleas and all stages of **brown dog ticks, American dog ticks, lone star ticks, and deer ticks** (which may carry Lyme disease) and chewing lice, apply this product to cats and kittens (8 weeks or older) as follows.

To remove and open pipette:
See label insert for opening instructions.

INSTRUCTIONS FOR APPLYING PRODUCT
To apply Fortress™ Spot On® for Cats:

1

2

Place pipette tip through animal's hair to the skin level between the shoulder blades. Squeeze pipette, applying entire contents in a single spot to the animal's skin. Avoid superficial application to the animal's hair. Allow area to dry before touching treated area. Only one pipette per treatment is needed. Fortress™ Spot On® for Cats can also be used for the treatment and control of flea, tick, and chewing lice infestations on breeding, pregnant, and lactating queens.

FREQUENCY OF APPLICATION
When used monthly, Fortress™ Spot On® for Cats completely controls flea, tick, and chewing lice infestations. Research demonstrates that Fortress™ Spot On® for Cats kills adult fleas for up to six weeks. Although Fortress™ Spot On® for Cats can control fleas for up to six weeks, if there is a high risk of re-infestation or if the cat has fleas which may cause flea allergy dermatitis, a once monthly application may be needed. Fortress™ Spot On® for Cats kills ticks for at least one month. A once monthly application is recommended where tick control is needed. Fortress™ Spot On® for Cats remains effective even after bathing, water immersion, or exposure to sunlight. Avoid contact with treated area until dry. Do not reapply Fortress™ Spot On® for Cats for 30 days.

Side effects. Monitor your cat after application. Side effects may include skin irritation such as redness, scratching, or other signs of discomfort. Gastrointestinal signs such as vomiting or diarrhea have also been reported as a result of grooming after treatment. If these or other side effects occur, consult your veterinarian or call 1-800-234-2269.

FIRST AID

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

HOTLINE NUMBER: Have the product container or label with you when calling a poison control center, doctor or going for treatment. Call 1-800-234-2269 for emergency medical treatment information.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS. CAUTION. Causes moderate eye irritation. Harmful if swallowed. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco.

HAZARDS TO DOMESTIC ANIMALS

For external use only. Do not use on kittens under 8 weeks of age. Individual sensitivities, while rare, may occur after using any pesticide product. Pets may experience some temporary irritation at the site of product application. If signs persist, or become more severe within a few days of application, consult a veterinarian immediately. If your pet has an unusual reaction to the initial application, consult a veterinarian before repeating treatment. Certain medications can interact with pesticides. Consult a veterinarian before using on medicated, debilitated or aged animals. Call 1-800-234-2269 for assistance.

Side effects. Monitor your cat after application. Side effects may include skin irritation such as redness, scratching, or other signs of discomfort. Gastrointestinal signs such as vomiting or diarrhea have also been reported as a result of grooming after treatment. If these or other side effects occur, consult your veterinarian or call 1-800-234-2269.
