MD-Cu_{29} ANTIMICROBIAL COPPER

TM

THIS TOUCH SURFACE IS A U.S. EPA REGISTERED

ANTIMICROBIAL COPPER

BACTERIA* KILLING SOLID METAL PRODUCT

This product is made of MD-Cu_{29} 2 antimicrobial copper. Laboratory testing has shown that when cleaned regularly, this surface kills greater than 99.9% of bacteria* within two hours and continues to kill 99% of bacteria* even after repeated contaminations. This surface continuously reduces bacteria* contamination, achieving 99.9% reduction within 2 hours of exposure. MD-Cu_{29} 2 helps inhibit the buildup and growth of bacteria* within 2 hours of exposure between routine cleaning and sanitizing steps.

* *Staphylococcus aureus, Enterbacter aerogenes,* Methicillin-Resistant *Staphylococcus aureus* (MRSA), *Escherichia coli* O157:H7, *Pseudomonas aeruginosa* and, Vancomycin-Resistant *Enterococcus faecalis* (VRE).

DIRECTIONS FOR USE
It is a violation of federal law to use this product in a manner inconsistent with its labeling.

PROPER CARE AND USE Clean and sanitize according to standard practice. Healthcare facilities must maintain the product in accordance with infection control guidelines. The use of this surface is a supplement to and not a substitute for standard infection control practices; users must continue to follow all current infection control practices, including those practices related to cleaning and disinfection of environmental surfaces. This surface has been shown to reduce microbial contamination, but does not necessarily prevent cross contamination. This surface may be subject to recontamination and the level of active bacteria at any time will depend on the frequency and timing of recontamination and cleanliness of the surface (among other factors). In order to have proper antimicrobial effect, this product must be cleaned and maintained according to the directions for use.

Do not wax, paint, lacquer, varnish, or otherwise coat this product.

Routine cleaning to remove dirt and filth is necessary for good sanitation and to assure the effective antibacterial performance of this surface. Cleaning agents typically used for traditional hard, non-porous touch surfaces are permissible. The appropriate cleaning agent depends on the type of soiling and the measure of sanitization required. Normal tarnishing or wear of this surface will not impair antibacterial effectiveness.

Not approved for direct food contact or food packaging uses.

Items exposed to outdoor environmental conditions are not representative of indoor laboratory test conditions, and, therefore, may impart reduced efficacy if not cleaned when visibly soiled.

STORAGE AND DISPOSAL

Dispose of by recycling or put in trash.

WARRANTY STATEMENT
If product is defective, contact Hussey Copper at the address below for return authorization guidelines.
