Chlorinating Granules

**Stabilized
Fast Dissolving**

ACTIVE INGREDIENT:
Sodium Dichloro-s-Triazinetrione-Dihydrate.....99.0%
INERT INGREDIENTS.....1.0%
AVAILABLE CHLORINE.....56.0%

**KEEP OUT OF REACH OF CHILDREN
NO SE DEJE AL ALCANCE DE LOS NIÑOS**

**DANGER
PELIGRO**

See back panel for first aid statement and other precautions

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

CSROSIVE: Causes irreversible eye damage. May be fatal if inhaled. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin or on clothing. Do not breathe dust, vapor or spray mist. Wear goggles, face shield or safety glasses. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, bays, or public water, unless the product is specifically identified and addressed in an NPDES Permit. Do not discharge effluent containing this product into sewer systems without previously notifying the sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS: STRONG OXIDIZING AGENT. Will burn with the evolution of chlorine and equally toxic gases. Contact with water slowly liberates irritating and hazardous chlorine containing gases. Decomposes at 460 F to 480 F with liberation of harmful gases. Mix only with water. Use clean dry vessels. Do not add this product to any dispersing devices containing remnants of any other product. Such use may cause a violent reaction leading to a fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. **In case of fire:** If possible isolate container in open air or well ventilated area. Flood with large amounts of water. In case of contamination or decomposition, do not reuse container.

PRACTICAL TREATMENT (FIRST AID)

If in eyes: Hold eyes open and flush with a steady, gentle stream of water for 15 minutes. Get medical attention. **If inhaled:** Remove victim to fresh air. If not breathing, give artificial respiration preferably mouth-to-mouth. Get medical attention. **If on skin:** Wash with plenty of soap and water. Get medical attention if irritation persists. **If swallowed:** Promptly drink large quantities of water. Avoid alcohol. Get medical attention. **Note to physician:** Probable mucosal damage may contraindicate the use of gastric lavage.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

1. FOR CONTROL OF BACTERIA AND ALGAE (OUTDOORS) IN SPAS: Before bathing, test water pH, chlorine residual and alkalinity using a suitable test kit. Adjust chlorine residual to 3.0 ppm. After bathing, super-chlorinate to 5.0 ppm (1 level teaspoon per 500 gallons of water). Use a chlorine stabilizer especially outdoors. To prolong chlorine residual, maintain pH of water between 7.2 and 7.6 and total alkalinity between 125 and 175 ppm with SPA KEM pH-PLUS (+) or SPA KEM pH-MINUS (-).

2. This product does not affect pH or alkalinity of water. One level tsp. (1/2 tsp.) per 500 gal. of water gives 1.0 ppm and 1 level tbsp. gives 5.0 ppm of chlorine. To use, broadcast granules into water with jets running. Bathing can start at once.

3. With 4 bathers in a 500 gal. spa a 2.0 ppm chlorine residual can drop below the minimum 1.0 ppm in 15 to 20 minutes. Less water or more bathers will accelerate loss. Test often and keep chlorine residual above 1.0 ppm.

4. Weekly super-chlorinate water to 5 or 6 ppm (see 2 above). Re-entry into treated spas is prohibited above levels of 3 ppm of chlorine. Draining and cleaning of spa is recommended whenever the water becomes difficult to manage or chlorine stabilizer goes over 100 ppm as measured with a suitable cyanuric acid test kit. Avoid use of products such as body lotion that consume chlorine.

STORAGE AND DISPOSAL

Keep product dry in tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. In case of decomposition isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding. Do not contaminate water, food or feed by storage or disposal. **PESTICIDE DISPOSAL:** Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Representative at the nearest EPA Regional Office for guidance. **CONTAINER DISPOSAL:** Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by state or local authorities, by burning. If burned, stay out of the smoke.

NOTE: Do not allow direct contact of this product on the following surfaces: vinyl, metallic, fiberglass, painted or colored plaster. Product will bleach color of it.
