

DISCONTINUED

- Operate the pump system 4-8 hours (minimum) after applying SHOCK QUICK™.
- Use one pound of SHOCK QUICK™ to treat 12,000 - 15,000 gallons of pool water every week for best results.

SUPER CHLORINATION: Whenever the pool water loses its sparkle, turns green, or the chlorine residual falls rapidly after regular chlorination, super chlorination is recommended. During the summer months, water should be super chlorinated with 1.5 lbs. per 10,000 gallons of pool water every 10 to 14 days. Do not use the pool until the chlorine residual has dropped to 3ppm.

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMAN AND DOMESTIC ANIMALS**

DANGER:

Causes irreversible eye damage. May be fatal if inhaled. Causes skin irritation. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin, or on clothing. Do not breathe dust. Wear goggles or face shield, and a mask or pesticide respirator approved by the National Institute for Occupational Safety and Health. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms.

PHYSICAL OR CHEMICAL HAZARD

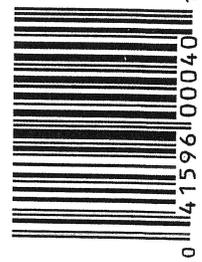

STRONG OXIDIZING AGENT. WILL BURN WITH THE EVOLUTION OF CHLORINE AND EQUALLY TOXIC GASES. CONTACT WITH WATER SLOWLY LIBERATES IRRITATING AND HAZARDOUS CHLORINE CONTAINING GASES. DECOMPOSES AT 460° F TO 480° F WITH THE LIBERATION OF HARMFUL GASES.

***During Super-Chlorination *Durante Super-Clorinación**

Mix only with water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with the generation of heat, liberation of hazardous gases and possible generation of fire or explosion.

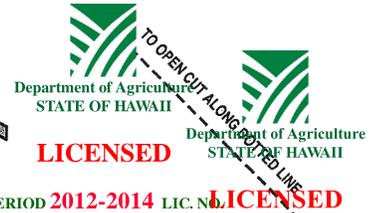

IN CASE OF FIRE, if possible, isolate container in open air or well ventilated area. Flood with large volume of water.
IN CASE OF CONTAMINATION, do not reseal container.

**NET 1 LB.
WT. (.4536 Kg.)**

The SHOCK QUICK™ Advantages:

This special blend of patented ingredients does it all. SHOCK QUICK™ works fast allowing swimmers back into the pool in just 15 minutes. This is a premium grade shock product, so it takes only one pound of SHOCK QUICK™ to treat 12,000 - 15,000 gallons of pool water. SHOCK QUICK™ can be added directly into the water without pre-dissolving and it is ideal for all types of swimming pools. It destroys swimmer wastes and other impurities that cause cloudy water. SHOCK QUICK™ dissolves faster than ordinary shock products without leaving residue. It does not increase the pH of the pool water or contain calcium that causes scale build-up.

DO NOT PRE-DISSOLVE IN CONTAINER (ie, bucket) BEFORE APPLYING.
NO DISUELVE EN NINGUN ENVASE ANTES DE APLICAR
Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle.
DIRECTIONS FOR USE:

It is a violation of federal law to use this product in a manner inconsistent with its labeling.
DAILY USE: Regularly check chlorine residual with a test kit and chlorinate daily or as needed to maintain 1.0 to 1.5 ppm residual chlorine. **NOTE:** Two ounces of this compound per 5,000 gallons of pool water will increase an existing chlorine level by 1.0 ppm (1/8 rounded measuring cup = 1 oz.).

WEEKLY USE:

- Check the pH of the pool water daily, adding sodium bisulfate (KEM TEK™ pH MINUS (-)) or soda ash (KEM TEK™ pH PLUS (+)) or equivalent products as necessary to maintain pH in the 7.2-7.6 range.
- SHOCK QUICK™ is made up of fine particles that dissolve almost instantly when applied to water. Use the entire bag for each application (if applicable). For best results, pour a steady stream of SHOCK QUICK™ into deep end of pool or pour into the skimmer with the pump operating. Pour near the water surface (particularly if the wind is present while applying) to ensure the entire dose enters the water.

STORAGE AND DISPOSAL: STORAGE: Keep product in tightly closed container when not in use. Store in cool, dry well-ventilated area away from heat or open flame. **DISPOSAL:** If empty: Nonrefillable container. Do not reuse or refill this container. Place in trash collection or offer for recycling if available. If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

FIRST AID	
If In Eyes	Hold eye open and flush with plenty of water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor immediately for treatment advice.
If Inhaled	Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration preferably mouth-to-mouth if possible. Call a poison control center or doctor immediately for treatment advice.
If Swallowed	Call a poison control center or doctor immediately for treatment advice. Promptly drink large quantity of water if able to swallow. DO NOT induce vomiting unless told to do so by poison control center or doctor. Do not give anything by mouth to an unconscious person.
If on Skin or Clothing	Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor immediately for treatment advice.
Have the product container or label with you when calling poison control center or doctor, or going for treatment. For assistance call 1-800-767-7665 Note to Physician: Probable mucosal damage may contraindicate the use of gastric lavage
