KILLS AND CONTROLS ALL TYPES OF ALGAE

Algaecide

Formulated with Water Clarifier

Fast Acting Results in 24 hours

Salt System Compatible

ACTIVE INGREDIENTS:

Copper Ethanolamine Complex, Mixed* (copper ethanolamine complex, CAS No. 14215-52-2, copper triethanolamine complex, CAS No. 82027-59-6)	10.9%
OTHER INGREDIENTS	89.1%
TOTAL	100.0%

*metallic copper equivalent, 3.5%.

NET 1 QT (32 FL OZ)

KEEP OUT OF REACH OF CHILDREN

CAUTION

See back panel for First Aid statement and other precautions

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

KEM-TEK POOL & SPA CARE ALL-IN-ONE ALGAECIDE does an effective job of controlling green, blue-green and mustard colored algae growth in swimming pools. For black algae problems, the use of KEM-TEK POOL & SPA CARE BLACK ALGAE TREATMENT is recommended. Follow all precautions, directions and restrictions per their labeling for all pesticide products being used. **1.** Adjust pH of pool water to 7.2-7.6. Use KEM-TEK POOL & SPA CARE pH PLUS (soda ash) to raise pH and KEM-TEK POOL & SPA CARE SWIMMING POOL MURIATIC ACID to lower it. Follow the instructions on the back panel of whichever product is used. **2.** Add 1 pound of KEM-TEK POOL & SPA CARE SHOCK QUICK BONUS 10+5, or 3 quarts of KEM-TEK POOL & SPA CARE CHLORINATING LIQUID per 10,000 gallons of pool water to oxidize water soluble wastes. Allow to circulate one hour. (Note: Do not enter the pool until chlorine residual drops to 3.0 ppm). **3.** Using an algae brush, brush algae spots prior to product application. Add 10 oz. of this product per 10,000 gallons of pool water. Preferably, dilute the concentrate into one or two gallons of water and apply to the deep end of the pool. **4.** Filter continuously for 24 hours. Brush daily for the next few days if necessary to promote penetration of product into algae spots to improve effectiveness. Periodically check available chlorine and adjust if necessary to maintain a 3 ppm minimum during treatment. **5.** Dead algae may be visible as a gray or white cloudiness. Living algae will have a green, brown, yellow or black color. If algae has color after 24 hours, repeat treatment as necessary for removal. **6.** Once algae is dead, turn off filter system (including timer) allow 18 to 24 hours for dead algae to settle to the bottom of the pool. **7.** Remove dead algae by brushing and vacuuming as needed. Backwash the filter. Return filter system to normal operation. **8.** Add 5 oz. of this product per 10,000 gallons of pool water every two weeks as a maintenance dose.

TO ESTIMATE POOL CAPACITY

RECTANGULAR POOLS: Length x Width x Average Depth (in feet) x 7.5 = gallons.

ROUND POOLS or OVAL POOLS: Average Diameter (length) x Average Diameter (width) x Average Depth (in feet) x 5.9 = gallons.

PRECAUTIONARY STATEMENTS:

Hazards to humans and domestic animals

CAUTION: Harmful if swallowed. Avoid contact with skin and eyes. Wash thoroughly with soap and water after handling. Do not apply this product in a manner as to directly or through drift expose workers or other persons.

ENVIRONMENTAL HAZARDS: This product is toxic to fish.

STORAGE AND DISPOSAL:

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Keep product in tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat and open flame.

PESTICIDE DISPOSAL AND CONTAINER HANDLING:

IF EMPTY: Nonrefillable container. Do not reuse or refill this container. Place in trash or offer for recycling if available.

IF PARTLY FILLED: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.
