FLEAS AND TICKS ON DOGS:
 Start spraying at the animal's head, avoiding the eyes, nose and mouth as you spray. Make sure the animal's entire body is covered including the ears, under body and tail. While spraying, fluff the hair so that the spray will penetrate the skin. Make sure spray wets thoroughly. Avoid contact with genitalia. Repeat as necessary.

PET AREAS
 To control Fleas and Brown Dog Ticks on premises: Thoroughly spray infested areas, pet beds, resting quarters, nearby cracks and crevices, along and behind baseboards, moldings, window and door frames, and entire areas of floor and floor covering. Fresh bedding should be placed in animal's quarters following treatment. Concurrent treatment of animals is recommended. Repeat treatment as needed.

TO KILL AND REPEL FLYING INSECTS IN ANIMAL QUARTERS:
 Spray in areas where insects congregate. Direct spray to contact insects for rapid knockdown and kill. Spray around outside of door facings and screens to render areas unattractive to insects. This helps to repel insects and prevent entrance into building.

STORAGE: Store in a cool, dry place. Do not store near heat or open flame.
