COVER PAGE

FOR CATS:

For Fleas, Lice, and Flea Eggs: A light, even coverage of the hair coat will provide effective flea control. Do not allow spray from application or damp animal to come into contact with painted or finished surfaces, including wood floors/furniture, leather/vinyl materials, or other surfaces of concern. For best results, ruffle the coat while spraying against the natural lay of the hair. Cover animal's eyes with hand and spray head, ears, and chest. With cloth, rub into face around mouth, nose, and eyes. Then spray the neck, middle, and hindquarters, finishing with legs last. Avoid spraying rectum and genitals. Do not allow animals, cats in particular, to become chilled. Apply at the rate of 1 to 2 squeezes of the trigger sprayer per pound of body weight. Repeat every month for continuous home flea infestation prevention. For continuous protection against adult fleas, or if your pet becomes reinfested with adult fleas from outside sources, reapply Adams™ Flea & Tick Mist for Cats with Precor® once weekly.

For Ticks: Apply as directed for fleas, but make sure spray thoroughly wets ticks. For continuous protection against ticks, reapply once weekly. **For Mosquitoes:** Apply as directed for fleas. For continuous protection against mosquitoes, reapply once weekly.

FOR KITTENS:

For Fleas, Lice, and Flea Eggs: A light, even coverage of the hair coat will provide effective flea control. Do not allow spray from application or damp animal to come into contact with painted or finished surfaces, including wood floors/furniture, leather/vinyl materials, or other surfaces of concern. Leaving the eyes, nose, and mouth exposed, treat kittens weighing less than 3 lbs. by wrapping the animal in a towel which has been lightly sprayed with Adams™ Flea & Tick Mist for Cats with Precor®. Keep the animal wrapped for 5 to 10 minutes. Or lightly spray a brush or cotton ball and work thoroughly into the hair coat. Adult fleas may then be removed from the coat by picking or combing. Kittens over 3 lbs. may be treated the same as cats with 1 to 2 squeezes of the trigger sprayer per pound of body weight. Reapply every 1 month, for continuous home flea infestation prevention. For continuous protection against adult fleas, or if your pet becomes reinfested with adult fleas from outside sources, reapply once weekly. Do not

allow animal to become chilled. Do not use on kittens under 12 weeks of age.

STORAGE and DISPOSAL:

Storage: Do not store near heat or open flame. Store away from children and animals.

Disposal: Nonrefillable container. Do not reuse or refill this container. **If empty:** Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS – CAUTION: Harmful if absorbed through skin. Avoid contact with skin, eyes, or clothing. May cause skin sensitization in rare cases with repeated use. Consult a veterinarian before using this product on debilitated, aged, pregnant, nursing or medicated animals. Sensitivities may occur after using ANY pesticide product for pets. If signs of sensitivity occur bathe your pet with mild soap and rinse with large amounts of water. If signs continue, consult a veterinarian immediately.

FIRST AID

Call a poison control center or doctor immediately for treatment advice.

If on skin or clothing • Take off contaminated clothing. • Rinse skin immediately with plenty of water for 15-20 minutes.

If in eyes • Hold eye open and rinse slowly and gently with water for 15-20 minutes. • Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-234-2269 for emergency medical treatment information.

PHYSICAL HAZARDS: Combustible. Do not use or store near heat or open flame.
