PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS & DOMESTIC ANIMALS

CAUTION

Harmful if swallowed. Avoid excessive contact with skin. Avoid contact with eyes or clothing. Do not apply to horses to be used for food.

STATEMENT OF PRACTICAL TREATMENT

If Swallowed: Drink 2 glasses of water and induce vomiting. Contact physician. If On Skin: Wash with soap and water. If in Eyes: Rinse eyes with plenty of water.

PHYSICAL OR CHEMICAL HAZARDS

Flammable. Keep away from heat or open flame.

ENVIRONMENTAL HAZARDS

Keep out of lakes, streams or ponds. Do not contaminate water by cleaning of equipment or disposal of wastes.

WIPE Fly Protectant is specially formulated for use on valued race horses and fine show horses, but will prove of equal value to pleasure riders seeking effective, long-lasting fly protection for their animals. Actually helps in the removal of dirt and dandruff. Imparts a high sheen to the hair when brushed out. And, it is pleasant to use. Has a light, bright, pleasing fragrance.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

SHAKE WELL BEFORE USING.

Before applying Wipe to your horse, brush him down thoroughly to remove loose dust and dirt.

Moisten (but do not soak) a folded piece of Turkish toweling (approximately 12" x 15") or an Applicator Mitt with Wipe. Rub briskly against the growth direction of the hair. Give special attention to the shanks, legs, shoulders, neck and facial areas of the horse where flies tend to cause the greatest problems. Add more Wipe to the applicator as needed, applying approximately one to two ounces for the total application on a daily basis (the variance will depend on the size of the horse). Groom with a brush.

To kill attached ticks, dab Wipe directly on the tick with a saturated cloth.

A FEW IMPORTANT POINTS TO REMEMBER:

- In order to keep the applicator moist and insure proper coverage of Wipe it is recommended that the cloth used be kept in an airtight container (a tin can will do) between uses.
- Regular daily applications of Wipe may build up repellency. Because of this, its effectiveness may be increased enabling a reduction in the amount of Wipe applied on a daily basis.
- To provide maximum effectiveness, the best time for application is early morning.
- Climatic conditions such as temperature and humidity, and cleanliness of the horse's coat will affect the amount of repellent required to do an effective job. Because of this, you may have to experiment with the amount of Wipe applied in order to arrive at the optimum amount needed.

IMPORTANT:

- Wash hands thoroughly after using.
- Do not use while smoking.
- Use only Turkish toweling or Wipe Applicator Mitt (not a substitute material) to apply Wipe.
- Avoid using excessive amounts of Wipe on your horse. Do not soak the skin.

STORAGE & DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store tightly closed in a cool, dry place that is inaccessible to children and pets. Keep away from heat, sunlight or open flame.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Triple rinse empty container. Then dispose of in a sanitary landfill, or by other approved State and local procedures.
