FIRST AID

IF SWALLOWED:	<ul style="list-style-type: none"> Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.
IF ON SKIN OR CLOTHING:	<ul style="list-style-type: none"> Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
IF IN EYES:	<ul style="list-style-type: none"> Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for further treatment advice.

HOT LINE NUMBER

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-888-908-TICK (8425) for emergency medical treatment information.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to aquatic organisms, including fish and invertebrates. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

USE RESTRICTIONS

- Do not apply to puppies less than 12 weeks old. Do not apply to kittens less than 6 months old.
- Consult a veterinarian before applying this product on medicated, debilitated, aged, pregnant or nursing animals.
- Sensitivities may occur after using ANY pesticide product for pets. If signs of sensitivity occur, bathe your pet with mild soap and rinse with large amounts of water. If signs continue, consult a veterinarian immediately.

FOR USE ON CATS AND KITTENS
OVER 6 MONTHS OF AGE, DOGS AND PUPPIES
OVER 12 WEEKS OF AGE TO KILL FLEAS AND TICKS.

The dual synergistic pyrethrins provide immediate killing of fleas and ticks on the pet. Pyriproxyfen is absorbed onto, and sticks tightly to hair and skin, even after complete rinsing. This insect growth regulator (a synthetic flea hormone) kills fleas and their eggs for 1 month and breaks the flea's life cycle by preventing the development of new fleas in the pet's environment and the build-up of reinfestation pressure. Shake well before using. Wet the pet thoroughly with warm water. Apply product onto the pet's back. For dogs, use approximately 1 teaspoon for each 5 lbs of bodyweight. For long hair dogs, you can use up to 1 tablespoon for each 5 lbs of bodyweight. Do not apply more than 16 tablespoons (8 fl oz) per dog. For cats, use approximately 1 teaspoon for each 5 lbs of bodyweight. For long hair cats you can use up to 1 tablespoon for each 5 lbs of bodyweight. Do not apply more than 6 tablespoons (3 fl oz) per cat. Massage well into the skin to obtain good lathering over the entire body. Allow lather to remain in contact for at least 10 minutes then rinse off. Allow pet to air dry or blow dry. To maintain effective flea life cycle control (through IGR flea egg killing) repeat treatment at least once every month. Under conditions of flea reinfestation pressure from the environment, repeat treatment when new parasites are seen on the pet, but not more frequently than once weekly on dogs and twice monthly on cats.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed, by storage or disposal. **PESTICIDE STORAGE:** Do not store near heat or open flame. Store in original container in a cool, dry place inaccessible to children and pets. **PESTICIDE DISPOSAL AND CONTAINER HANDLING:** Non-refillable container. Do not reuse or refill this container. If empty: Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.
