**PRECAUTIONARY STATEMENTS  
ENVIRONMENTAL HAZARDS**

This product is toxic to fish. Do not apply directly to water. Do not contaminate water when disposing of equipment washwaters. Do not apply when weather conditions favor drift from target areas.

**WHY THIS PRODUCT IS SO EFFECTIVE:**

1. This product is highly attractive to many ant species, including acrobat ants, Argentine ants, bigheaded ants, carpenter ants, cornfield ants, crazy ants, field ants, fire ants, ghost ants, harvester ants, odorous house ants, pavement ants, Pharaoh ants, thief ants and the Texas leafcutting ant. The granules are carried directly into the mound by workers as food for the colony.
2. Inside the mound, the bait is passed to the queen, as well as to other ants. By the end of one to four weeks, the queen and most of the ants in the mound will have eaten this product and died.
3. When the queen is dead, no new worker ants can be produced, so the mound dies.

Use Rate Table (continued)

Treatment	Rate	Comments
<b>Broadcast treatment:</b> Texas leafcutting ant, acrobat ants, Argentine ants, bigheaded ants, carpenter ants, cornfield ants, crazy ants, field ants, fire ants (imported and native), ghost ants, harvester ants, odorous house ants, pavement ants, Pharaoh ants, thief ants	3 to 4 <sup>1</sup> / <sub>16</sub> oz./5,000 square feet	Bait can be broadcast using spreader/seeder equipment.
<b>Around structures:</b> acrobat ants, Argentine ants, bigheaded ants, carpenter ants, cornfield ants, crazy ants, field ants, fire ants (imported and native), ghost ants, harvester ants, odorous house ants, pavement ants, Pharaoh ants, thief ants	4 to 8 oz. per average building (2,000 sq. ft. bldg.)	Apply in a band 1 foot wide around the outside perimeter of the building. Treat areas such as porches, patios, driveways, sidewalks, flower gardens, and around trees, wood piles, where ants are trailing, feeding or nesting. Concentrate treatment at visible ant trails as well as cracks or crevices where ants may enter the structure.

**Use Rate Table (continued)**

Treatment	Rate	Comments
<b>Individual mounds:</b> acrobat ants, Argentine ants, bigheaded ants, carpenter ants, cornfield ants, crazy ants, field ants, fire ants (imported and native), ghost ants, harvester ants, odorous house ants, pavement ants, Pharaoh ants, thief ants	1 to 2 <sup>1</sup> / <sub>8</sub> oz. per mound	For Fire Ants, sprinkle bait around the mound, taking care to not disturb the mound. For all other listed ant species, sprinkle bait directly onto and around mounds using a disposable spoon or measuring cup. Do not contaminate kitchen utensils by use or storage. Do not apply more than 2.0 lb. per acre.

continued

**General Information:** This product is attractive to many ant species, and the delayed action of hydramethylnon allows foraging ants to bring the bait back to the nest so that the entire colony, including the queen(s), is destroyed. You should see fewer ants within a week of treatment. Some species may require additional applications to achieve maximum control.

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**Do not apply this product in a way that will contact any person or pet, either directly or through drift. Keep people and pets out of area during application.**

This product is not for use on crops, timber, plants or turf grown for sale or other commercial use, or for commercial seed production or for research purposes. Do not use this product on vegetable or other food crops. This product will retain its effectiveness for up to 3 months after the package has been opened.

**Outdoor Use**

This product controls acrobat ants, Argentine ants, bigheaded ants, carpenter ants, cornfield ants, crazy ants, field ants, fire ants, ghost ants, harvester ants, odorous house ants, pavement ants, Pharaoh ants, thief ants and the Texas leafcutting ant. This product is for use on lawns, landscaped areas, ornamental gardens and other noncropland areas, as well as on grounds surrounding poultry houses (excluding runs and ranges) or corrals and other animal holding areas. Avoid direct exposure of animals to the granules. Refer to the Use Rate Table for directions. Do not graze or feed treated lawn or sod clippings to livestock.

**Use Rate Table**

**Use Precautions:** Applications can be made any time that ants are active. However, this product should not be applied to wet ground or grass, or if rain is expected within 24 hours, or when temperatures are below 50°F. Avoid leaving the bait exposed to direct sunlight for prolonged periods. During hot weather, application is best performed in the early morning or early evening when temperatures are cooler and ants are active. Check treated colonies/mounds for ant activity 30-40 days after treatment. Repeat applications as needed.

Treatment	Rate	Comments
<b>Individual mounds:</b> Texas leafcutting ant	3/4 lb./colony	Locate the central concentration of mounds, indicating the location of the colony. Apply bait directly onto and around mounds using a disposable spoon or measuring cup. Do not contaminate kitchen utensils by use or storage. Do not apply more than 2.0 lb. per acre.
