The Complete Spa Care System

## CHLORINATING CONCENTRATE GRANULAR

STATE OF HAWAII  
Department of Agriculture  
**ACCEPTED**  
LICENSE NO. **9231.73**  
**Disc.**

LICENSED  
HAWAII  
DEPT. OF AGRICULTURE  
*Rev.*  
Period **2004-2006** No. **9231.73**

ACTIVE INGREDIENT  
Sodium Dichloro-s-Triazinetrione Dihydrate ..... 99%  
INERT INGREDIENTS: ..... 1%  
Available Chlorine ..... 55%

EPA Reg. No. 7364-80

EPA Est. No. 42291-CA-1

**KEEP OUT OF REACH OF CHILDREN  
DANGER**

See other precautions and first aid on back panel.

NET WT. 2 LB. (906 g)

### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

1. Chlorinate: Add ¼ oz. of Chlorinating Concentrate Granular per 500 gallons of water to the water prior to entering the spa. Wait 5 minutes then check chlorine residual. Residual chlorine must read between 2 to 3 ppm. If it does not, additional dosages of material should be added until it does. Once the chlorine residual is established in the 2 to 3 ppm range, the spa or hot tub may be entered.
2. Maintain: Chlorinating Concentrate Granular should be added daily or as necessary to maintain 2 to 3 ppm residual chlorine. Frequent checks should be made of residual chlorine using a reliable test kit. Chlorinating Concentrate Granular should be broadcast over the surface of the water and allowed at least 5 minutes mix time before sampling. Note: Heavy bather usage or the use of oils or lotions may increase the chlorine demand of the spa or hot tub resulting in the need for more frequent checks of chlorine residual.
3. Check pH: pH should be monitored with a reliable test kit and maintained at 7.2 to 7.8 range for clean, sparkling water. pH can be decreased by adding a suitable agent such as sodium bisulfate or increased by adding a suitable agent such as sodium bicarbonate.
4. Superchlorination: It is good practice to superchlorinate each 2 to 4 weeks. To superchlorinate, add 1 oz. of Chlorinating Concentrate Granular for each 500 gallons of water. Thoroughly clean spa, vacuum and cycle through filter. Resume program when chlorine residual reads 2 to 3 ppm.

### HOW TO CALCULATE SPA CAPACITY

| Shape of Spa or Hot Tub  | Gallons of Water (Dimensions in ft.)      |
|--------------------------|---|
| Rectangular              | Average depth x average width x 7.5       |
| Circular                 | Diameter x diameter x average depth x 5.9 |
| Oval with straight sides | Width x length x average depth x 6.7      |
| Irregular                | Consult spa or hot tub manufacturer       |

**STORAGE AND DISPOSAL:** Keep product dry in tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. In case of decomposition, isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding. Do not reuse empty container. Wrap container and put in trash. Do not contaminate water, food or feed by storage or disposal.

### PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

**DANGER: HIGHLY CORROSIVE.** Causes irreversible eye damage. Causes burns to skin. Irritating to nose and throat. May be fatal if swallowed. Will burn with the evolution of chlorine and equally toxic gases. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Avoid breathing dust or fumes. Wash thoroughly with soap and water after handling. Remove and wash contaminated clothing before reuse.

### ENVIRONMENTAL HAZARD

This product is toxic to fish and aquatic organisms.

### PHYSICAL OR CHEMICAL HAZARD

Strong oxidizing agent. Will burn with the evolution of chlorine and equally toxic gases. Contact with water slowly liberates irritating and hazardous chlorine-containing gases. Mix only with water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals may start a reaction with the generation of heat, liberation of hazardous gases and possible generation of fire and explosion. In case of fire, if possible, isolate container in open air or well-ventilated area. Flood with large volume of water. In case of contamination or decomposition, do not reseal container.

**KEEP THIS AND ALL OTHER CHEMICALS OUT OF REACH OF CHILDREN FOR THEIR SAFETY**

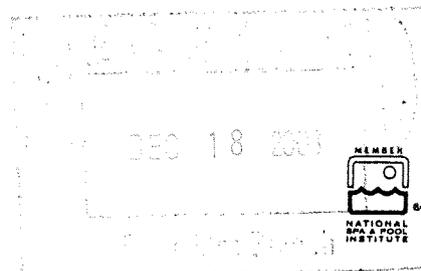

### FIRST AID

**IF SWALLOWED:** Call a poison control center immediately for treatment advice. Have the person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person. **IF IN EYES:** Hold eyelids open and rinse slowly with water for 15 to 20 minutes. Remove contact lenses if present after 5 minutes then continue rinsing eye. Call a poison control center or doctor for treatment advice. **IF ON SKIN OR CLOTHING:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 to 20 minutes. Call a poison control center or doctor for treatment advice. **IF INHALED:** Move a person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice. Have the product container or label with you when calling a poison control center or doctor, or going for treatment advice. **NOTE TO PHYSICIAN:** Probable mucosal damage may contraindicate the use of gastric lavage.
