- Quick acting, long lasting.

READ ENTIRE LABEL BEFORE USE.

USE ONLY ON CATS OR KITTENS 12 WEEKS OF AGE AND OLDER.

INTRODUCTION: Hartz® InControl™ Flea & Tick Drops for Cats is a topically applied long-lasting product specifically formulated for cats and kittens containing an insect growth regulator (IGR) which prevents flea eggs from maturing into biting adults. It also contains the highly effective flea, deer tick and mosquito killing agent Etofenprox, which kills biting adult fleas, deer ticks, and mosquitoes your cat may acquire from its surroundings. A single application of Hartz® InControl™ Flea & Tick Drops for Cats will provide egg hatch inhibition

DIRECTIONS FOR USE: *It is a violation of federal law to use this product in a manner inconsistent with its labeling.*

This product contains 4 monthly doses, each 1.8 ml.

Do not apply more often than once every month. Do not bathe cat within the first 24 hours after squeeze-on has been applied. Households with more than one cat should prevent cats from grooming each other until solution has dried.

USE ONLY ON CATS AND KITTENS 12 WEEKS OF AGE AND OLDER.

*Do not get this product in your cat's eyes or mouth.
1.8 ml dose for use on cats and kittens 5 lbs. and over.*

Bend at perforation and tear off 1st month's applicator. Hold applicator upright and snap tip back, away from the face and body.

Prior to application of the product, gently lift the cat's or kitten's hair coat on the back of the neck at the base of the skull, position the tip of the applicator on the cat's exposed skin and squeeze out the entire contents of the tube onto the cat's skin. Repeat application once monthly.

STORAGE & DISPOSAL:

STORAGE: Store in a cool, dry place. Do not store unused applicators separately from their packaging.

Container Disposal: **If Empty:** Do not reuse empty applicator. Place in trash or offer for recycling if available. **If Partly Filled:** Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.

for up to 4 weeks. Each package contains enough product for 4 monthly applications. Hartz® InControl™ Flea & Tick Drops for Cats provides relief from flea infestations for up to 4 weeks by killing adult fleas on your cat or kitten and flea eggs in your home. Adult fleas can live on your pet while producing vast numbers of eggs, which drop off your pet and develop in the surrounding environment. Normal insecticides will not kill the flea eggs, but Hartz® InControl™ Flea & Tick Drops for Cats kills adult fleas and flea eggs, breaking the flea life cycle and providing your cat relief from flea bites at the same time.

After application, your cat's natural skin oils disperse Hartz® InControl™ Flea & Tick Drops for Cats over your cat's body for protection against biting adult fleas and the development of flea eggs. Once adult fleas are evident on your cat, there is likely an infestation of flea eggs and flea larvae in your home. To completely kill the existing flea population, you may need to treat your home, and your pet's bedding, as well as your yard with traditional flea products approved for use on pets, around the home, or in your yard. Hartz® InControl™ Flea & Tick Drops for Cats can be used in conjunction with other Hartz® premise products. As with all flea products, they are most effective when used as part of a total program aimed at reducing all stages of fleas in the cat's environment. They are designed to complement each other in an integrated program for flea, deer tick, and mosquito management. To assure proper treatment, we recommend use of Hartz® products as directed to treat all pets in the household, as well as the indoor and outdoor home environments.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

HAZARDS TO HUMANS: Repeated exposure to etofenprox can cause skin irritation.

HAZARDS TO ANIMALS: For External Use on Cats Only.

Do not use on kittens less than 12 weeks old. Consult a veterinarian before using this product on debilitated, aged, pregnant or nursing animals. Certain medications can interact with pesticides. Consult a veterinarian before using on medicated animals. Sensitivities may occur after using ANY pesticide products for pets. If signs of sensitivity occur, bathe your pet with mild soap and rinse with large amounts of water. If signs continue, consult a veterinarian immediately.
