DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner other than for which it was intended. BAQUACIL can be used in both residential and public swimming pools and spas.

TREATING POOL

POOLS PREVIOUSLY TREATED WITH CHLORINATING CHEMICALS

Important – BAQUACIL SWIMMING POOL SANITIZER AND ALGISTAT (“BAQUACIL SANITIZER”) is incompatible with chlorinating chemical products. Consult your Authorized Dealer of BAQUACIL for information on balancing your pool water. Note: If the pool is a plaster pool, add 1 ¼ lbs. of BAQUACIL® METAL CONTROL per 10,000 gallons after the chlorine has been neutralized, and allow pump/filter to operate for 8-12 hours.

Check with chlorine test kit for free and combined chlorine prior to the beginning of neutralization. To destroy chlorine, add BAQUACIL® CHLORINE NEUTRALIZER per label directions or add 1 gallon of BAQUACIL® OXIDIZER (27% hydrogen peroxide) per 10,000 gallons of pool water. Filter overnight. Check with chlorine test kit. If free chlorine is detected, repeat neutralizer treatment.

FRESHLY FILLED AND DECHLORINATED POOLS

START UP WITH BAQUACIL

Note: If the pool water contains algae or is hazy, consult the problem-solving section of “The Pool Care Guide for BAQUACIL,” available from your Authorized Dealer of BAQUACIL.

- Backwash or clean pool filter. Check pool pH; adjust to 7.2–7.8 if necessary.
- Add BAQUACIL SANITIZER to give a content of 50 ppm (1/2 gallon product/10,000 gallons of pool water).
- After 24 hours, check pH and BAQUACIL SANITIZER concentration with BAQUACIL® TEST STRIPS and adjust if necessary.

NORMAL POOL ROUTINE

- Every week, check BAQUACIL SANITIZER concentration and pH.
- Maintain BAQUACIL SANITIZER concentration at about 50 ppm. If concentration falls 10 ppm or more, add a top-up dose. The level should not be allowed to drop below 30 ppm. For example, to raise the BAQUACIL SANITIZER level 10 ppm, add 1 pint per 10,000 gallons of water. Consult the booklet, “The Pool Care Guide for BAQUACIL,” for calculation instructions.

NOTE: BAQUACIL SANITIZER AND CHLORINE ARE INCOMPATIBLE. Refer to “The Pool Care Guide for BAQUACIL” for information on how to deal with accidental chlorination.

PROBLEM-SOLVING AND SUPPLEMENTAL POOL INFORMATION

Do not use in freestanding spas/hot tubs. Do not use in unpainted plaster pools previously exposed to metals which may cause staining. (See current “Pool Care Guide” for specific information.)

BAQUACIL is not compatible with many detergents and some supplemental algicides (such as those based on copper).

If algae development, cloudiness, or pool problems occur or additional information on water quality is desired, consult “The Pool Care Guide for BAQUACIL,” available from your Authorized Dealer of BAQUACIL.

STORAGE AND DISPOSAL

PESTICIDE DISPOSAL

Keep container closed when not in use. Store in original container in an area inaccessible to children.

PROTECT FROM FREEZING.

In case of a leak or spill, soak up with absorbent, such as sand, earth, or sawdust, and shovel into waste container. Remove waste to chemical waste area, and dispose of in accordance with local pollution regulations.

To dispose of excess product, securely wrap original container in several layers of newspaper and discard in trash.

CONTAINER DISPOSAL

Do not reuse container. To dispose of empty container, rinse thoroughly before discarding in trash.
FOR INFORMATION ON SPILLS, CALL 1-800-654-6911.
