LIMITATION OF LIABILITY
DO NOT APPROVE THIS MATERIAL WITHOUT PROPER INSPECTION
All materials (prints, color overlay proof, color proofs, film) should be thoroughly inspected by the recipient for copy, text, positioning, color break and layout prior to signature of approval. It is the responsibility of the recipient to examine and proofread all material prior to approval. Should the material work be found to be incorrect upon complete inspection, call 202-699-3856 and ask for your Customer Service Representative or the Customer Service Manager. The liability of Unitech Prepress Solutions, Inc. shall be limited to correcting its own product. Unitech Prepress Solutions, Inc. will not be liable for any other loss or damage including but not limited to costs of the printing plates or cylinders, overruns, press delays, and/or missing of insertion dates. Any cost due to revisions requested by recipient will be added to the invoice. This template is property of Unitech Prepress Solutions and not to be duplicated or copied without the permission of Unitech Prepress Solutions.

CALCIUM HYPOCHLORITE

- **SCALE CONTROL ADDITIVE TO REDUCE MAINTENANCE**
- **DESIGNED FOR USE IN CCH® FEEDERS SYSTEM**
- **Kills bacteria, destroys organic contaminants and controls algae**
- **Will not cause Overstabilization**

KEEP OUT OF REACH OF CHILDREN

DANGER: Contamination or Improper use may cause fire or explosion. DO NOT contaminate with any foreign matter, including other spa or pool treatment products. Add only into water. Read all precautionary statements on back label and first aid statements before use. DO NOT ADD THIS PRODUCT TO ANY FLOATER OR FEEDER THAT CONTAINS ANY OTHER PRODUCT.

Net Wt. 30 lbs. (13.6 kg)

ACTIVE INGREDIENT:
Calcium Hypochlorite68%
OTHER INGREDIENTS32%
TOTAL100%
Minimum Available Chlorine65%

FIRST AID: IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person. IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice. Have the product container or label with you when calling a poison control center or doctor, or going for treatment. **NOTE TO PHYSICIAN:** Probable mucosal damage may contraindicate the use of gastric lavage. **IN CASE OF EMERGENCY CALL: 1-800-654-6911.**

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling. **READ ALL PRECAUTIONARY STATEMENTS BEFORE USE.**
This product is designed to dissolve slowly providing a steady source of available chlorine in swimming pools to control the growth of algae, kill bacteria and destroy organic contaminants.
DIRECTIONS FOR USE IN CCH FEEDER
Before use, read the appropriate installation instructions and operating manual for your CCH Feeder.
1. Start the filter pump and check chlorine residual with a reliable test kit.
2. Fill the tablet container with this product only. Adjust chlorine feed rate setting according to the operating instructions in the feeder manual. After 24 hours, check the chlorine residual. If 1 to 4 ppm, leave the feed rate setting, if below 1 ppm, increase the feed rate. Allow sufficient time (e.g. one day) after changing the feed rate setting for the chlorine residual to readjust. The pool should not be re-entered until the 1 to 4 ppm chlorine residual is established.
3. Always maintain pH between 7.2 and 7.6 by using a suitable pH adjuster according to directions on the label for such products.
4. If cyanuric acid is used to stabilize available chlorine, follow label directions for this product and maintain the chlorine residual at 1 to 4 ppm as determined by the test kit.
5. Refer to operating manuals for feed rate information.
WATER BALANCE: For best product performance, swimmer comfort and crystal clear water, maintain pH in the 7.2-7.6 range. Maintain total alkalinity in the 60-120 parts per million. Maintain calcium hardness above 200 ppm. Use a reliable test kit that measures all these ranges. Use Calcium Hypochlorite Products to make adjustments. Follow label directions for each product.
OPENING YOUR POOL: Adjust and maintain pH in the 7.2 to 7.6 range. Follow "Shock Treatment" directions on this package. Allow this product to dissolve completely. Test free available chlorine residual with a pool test kit. Reenter pool when residual is 1-4 ppm, or when chlorine residual meets local public health guidelines.
Repeat treatment as needed. See directions for use in feeder for routine chlorination.
ROUTINE CHLORINATION: Throughout the pool season, adjust and maintain pH to 7.2-7.6.

FOR UNSTABILIZED POOLS: Begin by using 3 tablets per 10,000 gallons of pool water.
FOR POOLS STABILIZED USING STABILIZER CONDITIONER: Begin by using 1 tablet per 10,000 gallons of pool water.
FOR UNSTABILIZED AND STABILIZED POOLS: After each day, use a suitable test kit to check free available chlorine residual. Increase or decrease the number of tablets to maintain a free available chlorine residual of 1-4 ppm. Allow product to dissolve completely. Do not remove product from feeder until completely dissolved. Follow "Directions for Use."
SHOCK TREATMENT: Adjust and maintain pH to 7.2-7.6 with your preferred pH adjuster products. Follow label directions. Use Calcium Hypochlorite Chlorine Shock product. Follow label directions on those products. Follow "Directions for Use" on this package. **DO NOT** re-enter pool until the free available chlorine residual is 1 to 4 parts per million.
ALGAE CONTROL: Follow Shock Treatment directions on this label. **DO NOT** enter pool until the free available chlorine residual is 1-4 ppm. If necessary, repeat the treatment. To prevent possible staining take the following steps IMMEDIATELY after treatment: Thoroughly clean pool by brushing surface of algae growth, vacuum and cycle through filter.
STORAGE & DISPOSAL: Keep this product dry in its tightly closed container when not in use. Store in a cool, dry, well-ventilated area. Keep away from heat or open flame. **DO NOT** reuse empty container. Rinse empty container thoroughly with water to dissolve all material and discard container in trash. Do not contaminate food or feed by storage or disposal or cleaning of equipment. For disposal of a contaminated or decomposing product, see Emergency Handling.
PRECAUTIONARY STATEMENTS - HAZARDS TO HUMANS AND DOMESTIC ANIMALS - DANGER: HIGHLY CORROSIVE: Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Do not handle with bare hands. Wear goggles or face shield and use rubber gloves when handling. Only use utensils that are thoroughly clean and dry. Irritating to nose and throat. Avoid breathing dust and fumes. Remove and wash contaminated clothing before reuse.
CHEMICAL HAZARDS: DANGER. STRONG OXIDIZING AGENT. Add only into water. Use only clean dry utensils to dispense this product. **DO NOT USE THIS PRODUCT IN A CONTAINER OR DISPENSING DEVICE THAT HAS BEEN USED WITH ANY OTHER PRODUCT. KEEP ALL FOREIGN MATTER, INCLUDING OTHER POOL TREATMENT PRODUCTS, AWAY FROM THIS PRODUCT. DO NOT ALLOW TO BECOME**

WET OR DAMP BEFORE USE. CONTAMINATION MAY START A CHEMICAL REACTION THAT CAN GIVE OFF HEAT AND HAZARDOUS GASES AND MAY CAUSE A FIRE OR EXPLOSION. DO NOT touch this chemical with a flame or burning material (like a lighted cigarette).
ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms.
EMERGENCY HANDLING: In case of contamination or decomposition
• **DO NOT** reuse container.
• Immediately remove container to an open and well-ventilated outdoor area by itself.
• Flood with large amounts of water.
• Dispose of the container and any remaining contaminated material in an approved landfill area
