SHOCK

Fast Acting
Concentrated Chlorinating Agent
Controls Algae, Kills Bateria and
Destroys Organic Contaminants

KEEP OUT OF REACH OF CHILDREN DANGER

Contamination or improper use may cause fire, explosion or the release of toxic gases. Do not allow product to contact any foreign matter, including other water treatment products. If product is exposed to small amounts of water, it can react violently to produce heat and toxic gases and spatter. Do not add water to this product. Add only into water. Corrosive. Causes irreversible eye damage and skin burns. Harmful if swallowed, inhaled, or absorbed through the skin.

Read all precautionary statements on label and all first aid statements before use.

MANTENGASE FUERA DEL ALCANCE DE LOS NIÑOS
PELIGRO

ACTIVE INGREDIENT	
Calcium Hypochlorite	47.6%
Other Ingredients	52.4%
TOTAL	100.0%
Minimum Available Chlorine	45%

NET CONTENTS: 2 LBS. (907 g)

DIRECTIONS FOR USE:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ ALL PRECAUTIONARY STATEMENTS BEFORE USE.

This product is a concentrated chlorinating agent.

How to Use: For best results, see "WATER BALANCE" section below before treatment. Maintain these conditions for proper operation by frequent testing with a test kit. Do not allow cyanuric acid level to exceed 100 ppm. It is recommended that spas and hot tubs be drained every 30-90 days, more often under heavy use. Consult manufacturer's recommendations concerning the compatibility of chlorine sanitizers with their equipment. Some oils, lotions, fragrances, cleansers, etc., may cause foaming or cloudy water and may react with chlorine sanitizers to reduce their efficacy. If circulation is low, stir water before addition of chlorine or other chemicals.

WATER BALANCE: For best product performance, comfort and crystal clear water, use HTH Spa™ care products to maintain the following water balance.

Acceptable Range for Balance	
pH	7.2-7.6
Total Alkalinity	60-120 ppm
Calcium Hardness	Above 200 ppm
Available Chlorine	1-4 ppm

Follow label directions for each product and allow each product to dissolve and disperse before adding additional products to the pool. Use a reliable test kit that measures all these ranges. Re-entry into treated spas is prohibited with chlorine levels above 5 ppm for risk of bodily injury.

STARTUP (FRESHLY FILLED): For best results, see "WATER BALANCE" section above before treatment. Turn on circulation system and ensure that it is operating properly. Add one (1) ounce of this product to provide approximately 10 ppm available chlorine for each 500 gallons of water. Check the free available chlorine (FAC) and if less than 4-5 ppm, repeat as needed.

ROUTINE CHLORINATION FOR REGULAR USE: For best results, see "WATER BALANCE" section above before treatment. Turn on circulation system and ensure that it is operating properly. Scatter up to 0.7 ounces of this product per 500 gallons over the surface of the water to obtain 5 ppm free available chlorine. Test for free available chlorine and add additional product if necessary to maintain 3-5 ppm FAC while unit is in use. Do not enter the spa until chlorine residual reaches 1-5 ppm. Re-entry into treated spa is prohibited above levels of 5 ppm for risk of bodily injury. Test for free available chlorine and add additional product if necessary to attain a chlorine concentration of 1-5 ppm FAC.

SHOCK TREATMENT: After each use, shock treat with 1.4 oz. of this product to provide approximately 10 ppm available chlorine per 500 gallons of water, to control odors and algae. Repeat as needed. For preventative algae control: Shock treatment should control algae. However, if problems persist use your preferred HTH Spa™ Algaecide product regularly. Follow label directions on that product.

EXTENDED NON-USE PERIOD: For best results, see "WATER BALANCE" section above before treatment. During extended non-use periods when the spa or hot tub is not being used add 2 ounces of this product per 500 gallons twice a week with the circulation system running or as needed to maintain acceptable chlorine concentration.

FIRST AID:

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. **IF ON SKIN OR CLOTHING:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. **IF SWALLOWED:** Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person. **IF INHALED:** Remove person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

IN CASE OF EMERGENCY CALL: 1-800-654-6911

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS.

DANGER, Corrosive. Causes irreversible eye damage and skin burns. Harmful if swallowed, or absorbed through skin.

• Open in a well ventilated area. Avoid breathing dust and fumes. • Do not get in eyes, on skin or on clothing. Wear goggles and rubber gloves. For additional protection of skin, wear long sleeves and long pants. • Wash hands after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. • Remove contaminated clothing and wash clothing before reuse.

PHYSICAL AND CHEMICAL HAZARDS.

DANGER. If product is exposed to small amounts of water, it can react violently to produce heat and toxic gas and spatter. Do not add water to this product. Add only into water. • Do not allow to become wet or damp before use. **Can react with other materials, including other water treatment products, to cause fire, explosion, and the release of toxic gases.** • Keep all foreign matter, including other water treatment products, away from this product. • Use only clean dry utensils to dispense this product. • Do not allow this product to contact other water treatment products. If used with a skimmer, make sure skimmer is completely clean and free of residue from other water treatment products before putting this product in a skimmer. • Avoid spilling this product. **Exposure to heat can cause this product to rapidly decompose, leading to fire, explosion, and the release of toxic gases.** • Store in a cool, dry well ventilated area away from heat or open flame. **Strong oxidizing agent. This product can increase fire intensity.** • Keep away from heat and from flame and burning material (like a lit cigarette).

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms.

STORAGE AND DISPOSAL:

Keep this product dry in its tightly closed container when not in use. Store in a cool, dry, well-ventilated area. Keep away from heat or open flame. Nonrefillable container. Do not reuse or refill this container. Rinse empty container thoroughly with water to dissolve all material prior to disposal. Offer for recycling if available. Do not contaminate food or feed by storage or disposal or cleaning of equipment. **FOR DISPOSAL OF A CONTAMINATED OR DECOMPOSING PRODUCT SEE EMERGENCY HANDLING.**

EMERGENCY HANDLING: In case of contamination or decomposition - Do not reseal container. Immediately remove container to an open and well-ventilated outdoor area by itself. Flood with large amounts of water until the material is dissolved. Dispose of container and any remaining material in an approved landfill area.
