

• Do not mix this product with a small amount of water. Only add this product directly to your pool or spa. • Do not allow to become wet or damp before use.

Can react with other materials, including other water treatment products, to cause fire, explosion, and the release of toxic gases. • Keep all foreign matter, including other water treatment products, away from this product. • Do not allow this product to contact other water treatment products. If used with a skimmer, make sure skimmer is completely clean and free of residue from other water treatment products before putting this product in a skimmer.

Exposure to heat can cause this product to rapidly decompose, leading to fire, explosion, and the release of toxic gases. • Store in a cool, dry, well ventilated area away from heat or open flame.

Strong oxidizing agent. This product can increase fire intensity. • Keep away from heat and from flame and burning material (like a lighted cigarette).

ENVIRONMENTAL HAZARD: This pesticide is toxic to fish and aquatic organisms.

STORAGE & DISPOSAL: Keep this product dry in its tightly closed container when not in use. Store in a cool, dry, well-ventilated area. Keep away from heat or open flame. Nonrefillable container. Do not reuse or refill this container. Rinse and discard empty container thoroughly with water to dissolve all material prior to disposal. Offer for recycling if available. Do not contaminate food or feed by storage or disposal or cleaning of equipment. FOR DISPOSAL OF A CONTAMINATED OR DECOMPOSING PRODUCT SEE "EMERGENCY HANDLING".

EMERGENCY HANDLING: In case of contamination or decomposition—Do not reseal container. Place the container in an open and well-ventilated area by itself (if possible). Flood with large amounts of water until the material is dissolved. Dispose of container and any remaining material in an approved landfill area.

DANGER

Contamination or improper use may cause fire, explosion or the release of toxic gases. Do not allow product to contact any foreign matter, including other water treatment products. If product is exposed to small amounts of water, it can react violently to produce heat and toxic gases and spatter. Do not add water to this product. Add only into water. **Do not mix this product with a small amount of water. Only add directly to your pool.** Highly corrosive. Causes skin burns and irreversible eye damage. May be fatal if swallowed. Harmful if absorbed through skin.

Read all precautionary statements on label and all first aid statements before use.

FIRST AID: IF IN EYES: Hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. **IF ON SKIN OR CLOTHING:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15–20 minutes. Call a poison control center or doctor for treatment advice. **IF SWALLOWED:** Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person. **IF INHALED:** Remove person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice. **NOTE TO PHYSICIAN:** Probable mucosal damage may contraindicate the use of gastric lavage. Have the product container or label with you when calling a poison control center or doctor, or going for treatment. **IN CASE OF EMERGENCY CALL: 1-800-654-6911**

Net Wt. 1 lb. (16 oz.) (454 g)

Tear or cut here

RECTIONS FOR USE: This is a violation of Federal law to use this product in a manner inconsistent with its labeling. **READ ALL PRECAUTIONARY STATEMENTS BEFORE USE.**

WHY YOU SHOULD USE THIS PRODUCT: This is a highly effective, multi-purpose product that sanitizes, helps prevent algae and shock treats your pool. It is convenient, easy to use, and won't over-stabilize your pool. For crystal clear clear pool water, follow our 4 step pool care program: **Step 1:** Test and balance pool water, **Step 2:** Sanitize, **Step 3:** Shock at least once a week, and **Step 4:** Add algacide as directed.

HOW TO USE: Do not pre-mix this product. Only add this product directly to your pool or skimmer. Use entire contents when opened.

Method for dosing directly into pool: Add the recommended dosage of this product during evening hours while the filter pump is running. When adding this product to your pool, broadcast the product evenly over a wide area in the deepest part of the pool. If any granules settle to the bottom of the pool use brush to disperse.

Method for skimmer addition: Use this method to avoid bleaching vinyl liner or paint. Make sure that filter pump is on and properly recirculating through skimmer. Empty skimmer of all chemicals and/or debris. Contamination may cause an explosion or the release of toxic gases. Do not use this method when an automatic chemical dispensing device (e.g. feeder) is present. Pour this product slowly into skimmer, making sure that the material is drawn into the system at the same rate. Do not allow this material to accumulate as toxic gases may be generated.

POOL SHOCK TREATMENT: Add the recommended dosage of this product while the filter pump is running. See "HOW TO USE". When adding this product to your pool, broadcast the product evenly over a wide area in the deepest part of the pool.

DOSAGE RATE: Adjust and maintain pH to 7.2 - 7.4 with HTH[®] pH Plus[®] or HTH pH Minus. Follow label directions. Add 1 lb. (16 oz.) of this product per 12,000 gallons of water weekly to help prevent pool problems. Additional shock treatments may be required to correct problems which are caused by: • visible algae, • high bathing loads, • heavy wind and rainstorms. Additional shock treatments will also remove unpleasant odors and eye irritation. Do not re-enter pool until the free available chlorine residual is 1 - 4 ppm. Shock treat your pool when opening, then weekly to prevent pool problems.

Re-entry into treated pools is prohibited above levels of 4 ppm due to risk of bodily harm.

ALGAE CONTROL: If the sides or bottom of your pool develop algae spots, direct this product as close to the algae as possible. Follow "POOL SHOCK TREATMENT" directions. Note: Prolonged contact with pool surfaces may cause staining or bleaching. Immediately after treatment thoroughly clean pool by brushing surface of algae growth, vacuum and cycle through filter. If necessary, repeat the treatment. Pool should not be entered until the chlorine residual is 1 to 4 ppm.

OPENING YOUR POOL: Follow "POOL SHOCK TREATMENT" directions. Allow 30 minutes for product to disperse and test chlorine residual with a pool test kit. Repeat dosage, as needed, until chlorine residual is 1 to 4 ppm.

WATER BALANCE: For best product performance, swimmer comfort and crystal clear water, use HTH pool care products to maintain the following water balance:

	Acceptable Range for Balance
pH	7.2–7.6
Total Alkalinity	60–120 ppm
Calcium Hardness	Above 200 ppm
Available Chlorine	1–4 ppm

Follow label directions for each product and allow each product to dissolve and disperse before adding additional products to the pool. Use a reliable test kit that measures all these ranges.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER. Corrosive. Causes irreversible eye damage and skin burns. **May be fatal if swallowed.** Harmful if absorbed through the skin. **Irritating to nose and throat.**

- Do not get in eyes, on skin, or on clothing. Do not handle with bare hands. Wear goggles and rubber gloves when handling this product. For additional skin protection, wear long sleeves and long pants.
- Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet.
- Open in a well-ventilated area. Do not breathe dust or fumes.
- Remove and wash contaminated clothing before reuse.

PHYSICAL AND CHEMICAL HAZARDS: DANGER. If product is exposed to small amounts of water, it can react violently to produce heat and toxic gas and spatter. Do not add water to this product. Add only into water.
