DANGER

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Corrosive. Causes irreversible eye damage and skin burns. May be fatal if inhaled or absorbed through skin. Harmful if swallowed. Irritating to nose and throat. Do not get in eyes, on skin or on clothing. Wear goggles, protective clothing such as long sleeves and long pants, and rubber gloves. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove contaminated clothing and wash clothing before reuse.

OPEN IN A WELL VENTILATED AREA. AVOID BREATHING DUST OR FUMES.

Read all precautionary statements on back label and all first aid statements before use.

- Contains built-in algae protection
- Contains a built-in clarifier
- Creates softer pool water
- Protects equipment from stain and scale
- Provides long lasting chlorination

prevent algae

FIRST AID:

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

IN CASE OF EMERGENCY CALL:
1-800-654-6911

Net Wt. 40 lbs. (18.2 kg)

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

HTH® Preferred All-in-One 3" Chlorinating Tablets are a unique and highly effective pool water sanitizer.

Routine sanitization is important to keep your pool water free of bacteria and contaminants.

These convenient and easy to use **HTH® Preferred All-in-One 3" Chlorinating Tablets** are formulated to protect against chlorine loss from sunlight, and can be used in skimmers and floaters. In addition to sanitizing, **HTH® Preferred All-in-One 3" Chlorinating Tablets** have the additional benefits of preventing algae growth, clarifying pool water, and protecting your equipment from stain and scale. They are designed to dissolve slowly to provide a steady source of available chlorine.

For crystal clear pool water, follow our 4 step pool care program:

Step 1: Test and balance pool water, **Step 2:** Sanitize, **Step 3:** Shock at least once a week, and **Step 4:** Add algaecide as directed.

METHOD OF APPLICATION: Use in a floating dispenser, automatic chlorinator, or feeder designed for this product, or place in skimmer. Use in a new chlorinating device or any device which has previously contained only this product or trichloro-s-triazinetrione. If placed in the skimmer, run the pump a minimum of eight hours daily. **DO NOT** Use in floaters or feeders that have been used with other water treatment products. **DO NOT** Throw tablets directly into pool. **DO NOT** permit tablets to contact plastic pool linings or metal objects. **DO NOT** Use in any chlorinating device which has been used with other chlorinating compounds.

WATER BALANCE: To provide optimum product performance, swimmer comfort and crystal clear water always maintain pH from 7.2 to 7.6, total alkalinity from 80 to 120 parts per million (ppm), and calcium hardness above 200 ppm. Test frequently using an HTH® test kit or test strips that measures all these ranges.

Make any necessary adjustments promptly with the appropriate HTH® pool care products. Reentry into treated pools is prohibited with chlorine levels above 4 ppm for risk of bodily injury.

OPENING YOUR POOL: Balance pool water, shock treat, and stabilize your pool using **HTH® Stabilizer & Conditioner**. Follow the directions on the **HTH® Stabilizer & Conditioner** to balance pool water, shock treat, and stabilize. Then follow "ROUTINE CHLORINATION" directions.

ROUTINE CHLORINATION: Ensure that the skimmer basket or floater is free of any other chemicals, tablets, or residue. Place this product in the skimmer basket or floater. Use one tablet per 10,000 gallons of water.

Do not add other chemicals to the skimmer or floater while this product is present.

Reentry into treated swimming pools is prohibited above levels of 4 ppm free available chlorine due to risk of bodily injury. Place a new **HTH® Preferred All-In-One 3" Chlorinating Tablet** per 10,000 gallons of pool volume into the skimmer each week, or when the old tablet has fully dissolved. The number of tablets and frequency of use will vary with bather load, water temperature, rain, and pump operating time.

SHOCK TREATMENT: Adjust pH to 7.2 to 7.6 with an HTH® pH Plus or HTH® pH Minus per label directions. Shock treat weekly with an HTH® shock product to kill bacteria, control algae, and to keep water sparkling clear. Follow label directions of that product.

ALGAE CONTROL: If pool surface develops algae or feels slippery, follow shock treatment directions. Immediately after shock treatment, thoroughly clean pool by scrubbing surface of algae growth, vacuum and cycle through filter. If necessary, repeat the procedure. Pool must not be entered until the chlorine residual is 1-4 ppm.

PHYSICAL AND CHEMICAL HAZARDS:

DANGER. If product is exposed to small amounts of water, it can react violently to produce heat and toxic gas and spatter. Do not add water to this product. Add only into water.

- Do not mix this product with a small amount of water. Only add this product directly to your pool.
- Do not allow to become wet or damp before use.

Can react with other materials, including other water treatment products, to cause fire, explosion, and the release of toxic gases.

- Keep all foreign matter, including other water treatment products, away from this product.
- Use only clean and dry utensils to dispense this product.
- Do not allow this product to contact other water treatment products. If used in a skimmer, make sure skimmer is completely clean and free of residue from other water treatment products before putting this product in a skimmer.
- Avoid spilling this product.

Exposure to heat can cause this product to rapidly decompose, leading to fire, explosion, and the release of toxic gases.

- Store in a cool, dry, well ventilated area away from heat or open flame.

Strong oxidizing agent. This product can increase fire intensity.

- Keep away from heat and from flame and burning material (like a lighted cigarette).

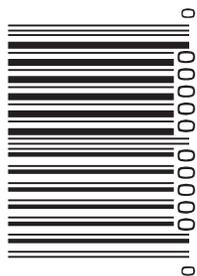

Contamination or improper use may cause fire, explosion or the release of toxic gases. Do not allow product to contact any foreign matter, including other water treatment products. **If product is exposed to small amounts of water, it can react violently to produce heat and toxic gases and spatter. Do not add water to this product. Add only into water.** Do not remove floater or other dispensing device from water for an extended period of time if it contains a tablet or tablet residue. **Do not mix this product with a small amount of water. Only add directly to your pool.** Corrosive. Causes irreversible eye damage and skin burns. Harmful if swallowed, inhaled, or absorbed through the skin.

ENVIRONMENTAL HAZARDS:

This product is toxic to fish and aquatic organisms.

00000

PART NO. 00000
00000-A-0413

STORAGE & DISPOSAL:

Keep this product dry in its tightly closed container when not in use. Store in a cool, dry, well-ventilated area. Keep away from heat or open flame. Nonrefillable container. Do not reuse or refill this container. Rinse empty container thoroughly with water to dissolve all material prior to disposal. Offer for recycling if available. If not, discard in trash. FOR DISPOSAL OF A CONTAMINATED OR DECOMPOSING PRODUCT SEE EMERGENCY HANDLING.

EMERGENCY HANDLING: In case of contamination or decomposition – Do not reseal container. Immediately remove container to an open and well-ventilated outdoor area by itself. Flood with large amounts of water. Dispose of the container and any remaining contaminated material in an approved landfill area.

WARNING AVISO

Children can fall into
bucket and drown.
Keep children away from bucket
with even a small amount of liquid.

Los Niños pueden caerse
a este cubo y ahogarse.
No deje que los niños se acerquen
a este cubo aunque solo contenga
una pequeña cantidad de liquido.
