NET CONTENTS:
2 x 3 QT (96 FL. OZ.)

FIRST AID:

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

IN CASE OF EMERGENCY CALL: 1-800-654-6911

DIRECTIONS FOR USE:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ ALL PRECAUTIONARY STATEMENTS BEFORE USE.

Note: This product degrades with age. Use a chlorine test kit and increase dosage, as necessary, to obtain the required level of available chlorine.

WHY YOU SHOULD USE THIS PRODUCT:

- Concentrated formula
- Contains less water than HTH® Liquid Chlorinator
- Dual Purpose: sanitizer and shock

SWIMMING POOL WATER DISINFECTION: For a new pool or initial start-up, superchlorinate with 40 to 80 fl. oz. of product for each 10,000 gallons of water to yield 5 to 10 parts per million (ppm) of available chlorine by weight. Check the level of available chlorine with a test kit. Adjust and maintain the alkalinity of the pool to between 60 to 120 ppm. Adjust and maintain pool water pH between 7.2 - 7.6.

To maintain the pool, add manually or by a feeder device 8 to 32 fl. oz. of this product for each 10,000 gallons of water to yield an available chlorine residual between 1 to 4 ppm by weight. Stabilized pools should maintain a residual of 1 to 4 ppm available chlorine. Test the pH, available chlorine residual and alkalinity of the water frequently with appropriate test kits. Frequency of water treatment will depend on temperature and number of swimmers. Every 7 days, or as necessary, super chlorinate the pool with 40 to 80 fl. oz. of product for each 10,000 gallons of water to yield 5 to 10 ppm available chlorine. Check the level of available chlorine with a test kit. Do not reenter pool until the chlorine residual is between 1 to 4 ppm.

WATER BALANCE: For best product performance, swimmer comfort and crystal clear water, use HTH® pool care products to maintain the following water balance:

Acceptable Range for Balance	
Total Alkalinity	60 - 120 ppm
pH	7.2 - 7.6
Available Chlorine	1-4 ppm

Follow label directions for each product and allow all adjusters to dissolve and disperse before adding additional products to the pool. Be sure to adjust your alkalinity levels first before adjusting your pH levels. Use a reliable test kit that measures all these ranges.

WINTERIZING POOLS: While water is still clear and clean, apply 12 fl. oz. of product per 1,000 gallons, while filter is running, to obtain a 15 ppm available chlorine residual. Cover pool, prepare heater, pump and filter components for winter by following manufacturer's directions.

Additional shocking to keep water clean and clear is recommended after: rain and heavy winds, high number of swimmers, increased water temperature, increased frequency of pool usage.

PRECAUTIONARY STATEMENTS**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

DANGER: Corrosive. May cause severe skin and eye irritation or chemical burns to broken skin. Causes eye damage. Do not get in eyes, on skin, or on clothing. Wear safety glasses or goggles and rubber gloves when handling this product. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Avoid breathing vapors. Vacate poorly ventilated areas as soon as possible. Do not return until strong odors have dissipated. Remove and wash contaminated clothing before reuse.

PHYSICAL OR CHEMICAL HAZARDS

DANGER: Strong oxidizing agent. Mix only with water according to label directions. Mixing this product with chemicals (e.g. ammonia, acids, detergents, etc.) or organic matter (e.g. urine, feces, etc.) will release chlorine gas that is irritating to eyes, lungs and mucous membranes.

ENVIRONMENTAL HAZARDS:

This pesticide is toxic to fish and aquatic organisms.

STORAGE & DISPOSAL:

Keep this product dry in its tightly closed container when not in use. Store in a cool, dry, well-ventilated area. Keep away from heat or open flame. Nonrefillable container. Do not reuse or refill this container. Rinse empty container thoroughly with water to dissolve all material prior to disposal. Offer for recycling if available. Do not contaminate food or feed by storage or disposal or cleaning of equipment. FOR DISPOSAL OF A CONTAMINATED OR DECOMPOSING PRODUCT SEE "EMERGENCY HANDLING."

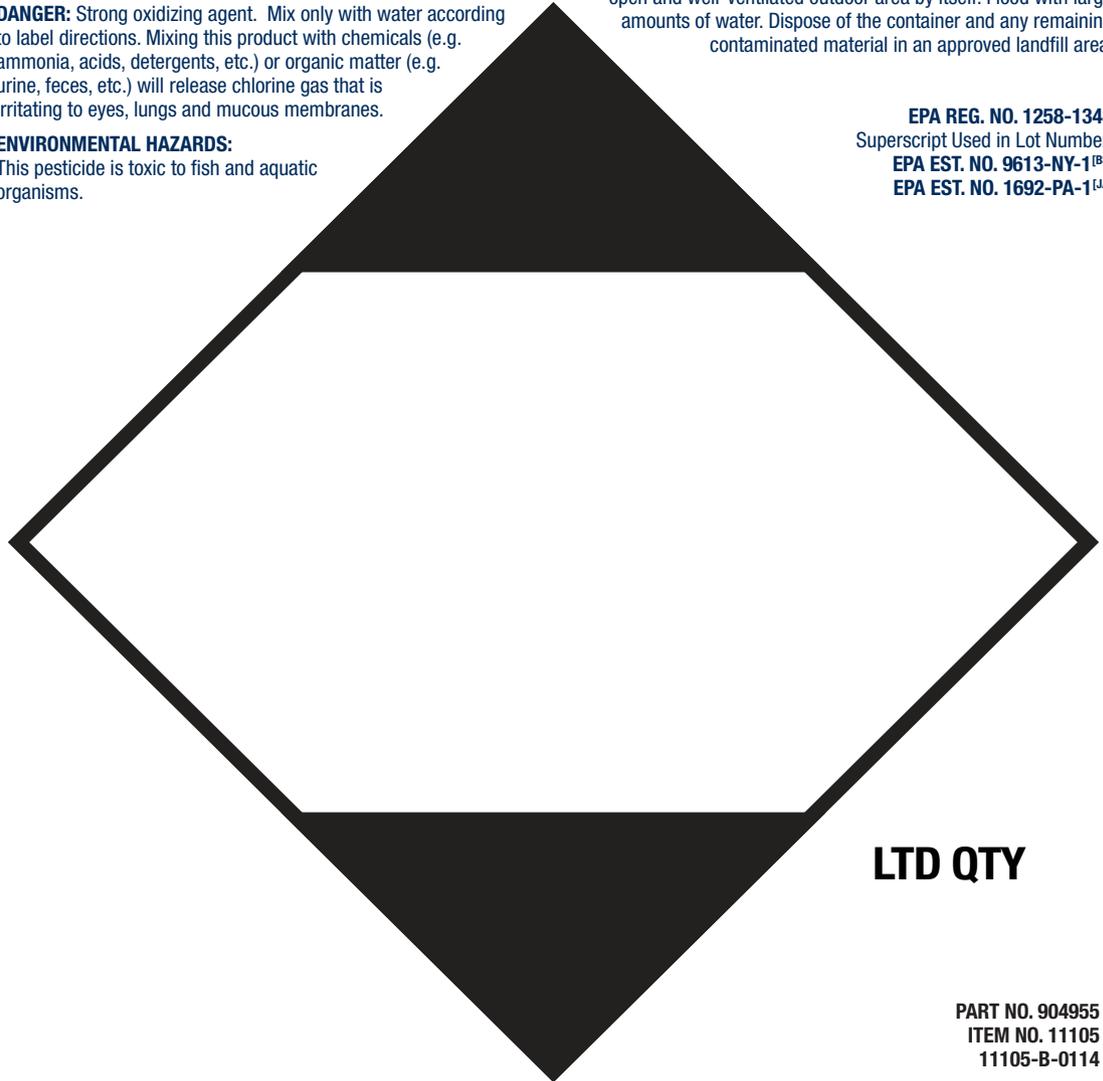

EMERGENCY HANDLING: In case of contamination or decomposition – Do not reseal container. Immediately remove container to an open and well-ventilated outdoor area by itself. Flood with large amounts of water. Dispose of the container and any remaining contaminated material in an approved landfill area.
