

FIRST AID:

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. **IF ON SKIN OR CLOTHING:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. **IF SWALLOWED:** Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice. Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. **IN CASE OF EMERGENCY CALL: 1-800-654-6911**

PHYSICAL AND CHEMICAL HAZARDS:

If product is exposed to small amounts of water, it can react violently to produce heat and toxic gases and spatter. Do not add water to this product. Do not mix this product with a small amount of water. Only add this product directly to your pool water.

• Do not allow to become wet or damp before use. Can react with other materials, including other water treatment products, to cause intense fire, explosion, and the release of toxic gases.

• Keep all foreign matter, including other water treatment products, away from this product. • Do not use this product in a floater or feeder that has been used with any other product. • Do not allow this product to contact other water treatment products. Exposure to heat can cause this product to rapidly decompose, leading to intense fire, explosion, and the release of toxic gases.

• Store in a cool, dry, well-ventilated area. Strong oxidizing agent. This product can increase fire intensity. Keep away from heat and from flame and burning material (like a lighted cigarette).

ENVIRONMENTAL HAZARDS:

This product is toxic to fish and aquatic organisms.

STORAGE & DISPOSAL:

Do not contaminate food or feed by storage or disposal or cleaning of equipment. Keep this product dry in its tightly closed container when not in use. Store in a cool, dry, well-ventilated area. Keep away from heat or open flame. Nonrefillable container. Do not reuse or refill this container. Rinse empty container thoroughly with water to dissolve all material prior to disposal. Offer for recycling if available. FOR DISPOSAL OF A CONTAMINATED OR DECOMPOSING PRODUCT SEE EMERGENCY HANDLING.

EMERGENCY HANDLING: In case of contamination or decomposition – Do not reseal container. Immediately remove container to an open and well-ventilated outdoor area by itself. Flood with large amounts of water. Dispose of the container and any remaining contaminated material in an approved landfill area.

Return to Blue Shock I

All-in-one chlorinates, shocks and kills algae
Crystal clear results in 24 hours
Treats up to 20,000 gallons

ACTIVE INGREDIENT: Calcium Hypochlorite.....56.44%
OTHER INGREDIENTS:.....43.56%
TOTAL:.....100.00%

KEEP OUT OF REACH OF CHILDREN DANGER

Contamination or improper use may cause intense fire, explosion, or the release of toxic gases. Do not allow product to contact any foreign matter, including other water treatment products. If product is exposed to small amounts of water, it can react violently to produce heat and toxic gases and spatter. Do not mix this product with a small amount of water. Only add directly to your pool. Do not add water to this product. Add only into water. Highly corrosive. Causes skin and eye damage. May be fatal if swallowed.

Read all Precautionary and First Aid statements on back panel before use.

NET CONTENTS: 2.3 LBS

DIRECTIONS FOR USE:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ ALL PRECAUTIONARY STATEMENTS BEFORE USE.

This product is a concentrated chlorinating agent. It is in a dry, free-flowing form. It kills bacteria, controls algae and destroys organic contaminants in pools.

Pace® Return to Blue Shock Treatment: If you are experiencing a severe algae bloom, which has turned your pool green, the **Pace® Return to Blue Shock Treatment** can turn your pool sparkling blue again.

This two-part system kills bacteria and algae that has invaded your pool and then makes it easy to vacuum out.

At the start of the season, or if a severe algae bloom occurs during the season, the pool can be treated and returned to its clear blue appearance within 24 hours by using **Pace® Return to Blue Shock I** and **Pace® Return to Blue II** as part of the **Pace® Return to Blue Shock Treatment**.

1. Add 2.30 lbs of **Pace® Return to Blue Shock I** per 10,000 gallons OR 4.60 lbs of **Pace® Return to Blue Shock I** per 20,000 gallons of pool water. If any granules settle to the bottom of the pool, use brush to disperse to assist in helping it to dissolve.
2. Once **Pace® Return to Blue Shock I** has completely been dispersed in the pool water, change valve to recirculate position and add 1.30 lbs of **Pace® Return to Blue II** flocculant per 10,000 gallons OR 2.60 lbs of **Pace® Return to Blue II** flocculant per 20,000 gallons of pool water through the skimmer.
3. Leave the system circulating for 1 hour then turn off the filter pump and allow to settle overnight.
4. The following day, change valve to vacuum position and vacuum the sediment to waste.
5. If the pool has not settled out or is not blue in color, repeat steps 1, 3 and 4.
6. Return valve to filter position after pool has been vacuued.

METHOD OF APPLICATION: Do not pre-mix this product. Only add this product directly to your pool or skimmer. Use entire contents when opened.

METHOD FOR DOSING DIRECTLY INTO POOL: Add the recommended dosage of this product during evening hours while the filter pump is running. When adding this product to your pool, broadcast the product evenly over a wide area in the deepest part of the pool. If any granules settle to the bottom of the pool, use brush to disperse.

METHOD FOR SKIMMER ADDITION: Use this method to avoid bleaching vinyl liner or paint. Make sure that filter pump is on and properly recirculating through skimmer. Empty skimmer of all chemicals and/or debris. Contamination may cause an explosion or the release of toxic gases. Do not use this method when an automatic chemicals dispensing device (e.g. feeder) is present. Pour this product slowly into skimmer, making sure that the material is drawn into the system at the same rate. Do not allow this material to accumulate as toxic gases may be generated.

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Irritating to nose and throat.**

- Do not get in eyes, on skin, or on clothing. Do not handle with bare hands. Wear goggles and use rubber gloves. For additional protection of skin, wear long sleeves and long pants.
- Open in a well-ventilated area. Avoid breathing dust and fumes.
- Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet.
- Remove and wash contaminated clothing before reuse.
