## Houseplant Insect Killing Soap<sup>II</sup>

### GENERAL:

Houseplant Insect Killing Soap<sup>®</sup> is a contact insecticide that provides rapid mortality of susceptible insects. Houseplant Insect Killing Soap<sup>®</sup> quickly penetrates the insect's body and disrupts the normal function of both cells and membranes. The net effect of this unique action is that the contents of the cells are lost and rapid death occurs. Houseplant Insect Killing Soap<sup>®</sup> is active only in the liquid state and only as a contact spray. No insecticidal activity should be expected once the solution has dried. As is common with most contact insecticides, Houseplant Insect Killing Soap<sup>®</sup> is effective on adult and immature stages of susceptible insects.
