LICENSE NO. 9426.618

Supplemental Labeling

To Expand Permitted Outdoor Uses to Sites Away from Building Structures and add Use on Tent Caterpillars

EPA Reg. No. 2724–786

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read the label affixed to the container for Zoëcon® Wasp-X™ Wasp & Hornet Spray before using.

Important

Use of Zoëcon® Wasp-X™ Wasp & Hornet Spray according to this labeling is subject to the use precautions and limitations imposed by the label affixed to the container for Zoëcon® Wasp-X™ Wasp & Hornet Spray.

GENERAL PRECAUTIONS AND RESTRICTIONS:

Do not allow adults, children, or pets to enter the treated area until spray has dried.
To apply at the maximum rate, spray for about 2 seconds to cover a space of 1 sq ft.

Use Zoëcon® Wasp-X™ Wasp & Hornet Spray to kill wasps, hornets, yellow jackets and other pests outdoors and indoors. Indoor locations would be identified as attics, steeples, mechanical rooms, barns, sheds, non-food/non-feed warehouses, garages, and carports. Do not apply indoors in habitable portions (areas) of domestic/residential dwellings, i.e., homes, residences, apartments, hotels, etc. ***DO NOT TREAT ANIMALS WITH THIS PRODUCT.*** *Remove livestock, pets, and birds before spraying indoors.*

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application.

Prior to treatment, shake can well, hold can upright and, stand upwind at a safe distance from nests, and spray away from self and other persons. This product is generally non-staining, but test product in a small, inconspicuous area to determine if staining potential exists.

WASPS, HORNETS, AND YELLOW JACKETS

Wasps: *Spray nest until thoroughly wet. Wasps on the nest will fall quickly to the ground, wasps returning to the nest will be killed by the residual action of the spray. Wait 24 hours before removing nest.*
Hornets: *Hornets build nests under eaves, in trees, shrubs, and ivy, and in sheltered spaces of buildings. It is best to wait until dusk or early morning to treat as hornets are less active at that time. Locate entrance hole in the nest, and thoroughly spray the entrance hole. Spraying the outside of the nest and not the entrance hole will not have the desired effect and may cause the hornets to attack. For best results for large nests, repeat application.*
Yellow Jackets: *Yellow jackets typically build nests in the ground or in tree stumps, landscape timbers, and railroad ties. Locate entrance holes, note that there may be more than one. Wait until dusk or early morning to spray. Spray entrances thoroughly. For best results for large nests, repeat application.*

OTHER OUTDOOR PESTS

Tent Caterpillars: *Treat webs in late afternoon when caterpillars return and spray tent until soaked.*

For information or in case of emergency, contact ***1-800-248-7763****.*

This labeling must be in the possession of the user at the time of application.

This supplemental label expires on June 2, 2013 and must not be used or distributed after this date.
