

SWIMMING POOL OXIDIZER

This product is a premium, multi-purpose product. By simply using this product once-a-week, it will reduce eye irritants and unpleasant odors. In addition, it corrects most cloudy conditions and restores water sparkle. Unlike other shock products, this product does not adversely affect the pH of pool water and leaves no cloudy residue. Swimmers can resume pool use in just 15 minutes after application. It can be used with all types of pool surfaces. Additional unique ingredients such as water clarifiers and flocculants aid the filter in removing small suspended particles to further enhance water clarity.

This product is compatible with chlorine, bromine, ozone, and can also be used with ionizers. This product dissolves quickly and completely. It does not require pre-mixing and leaves no undissolved solids. (In water temperatures less than 70° F this product may take longer to dissolve. To prevent possible damage to pool surface, use a pool brush to disperse any granules which may have settled to the bottom of the pool.) Do not use in pools sanitized with biguinides. This product is not a sanitizer or algicide. To sanitize your pool or for removal of algae, use the appropriate product specifically formulated for these purposes.

⚠DO NOT mix this product directly with any other shock products or pool chemicals as violent reactions could occur. This product must be applied from the bottle directly into the pool water. DO NOT pre-dissolve this product.

DIRECTIONS FOR USE:

It is a violation of Federal Law to use this product in any manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

With the pump in operation, apply the entire dosage at one time. Broadcast evenly around edges with special attention to areas of the pool where water circulation is the poorest. Apply directly to pool water only. Do not add through a skimmer or any automatic dispensing device.

For best results, test and adjust pool water pH to 7.2-7.6 prior to application. Apply product when pool is not in use. Swimming may resume in 15 minutes after product application.

ROUTINE MAINTENANCE: To help maintain a sparkling clear pool, add one pound of product to 12,000 gallons of water each week.

ADDITIONAL APPLICATIONS: Additional applications are recommended after periods of heavy pool usage, significant rainfall or the appearance of cloudy water. Follow routine maintenance instructions.

OFF SEASON MAINTENANCE: Pools which are kept circulating during the winter season require less frequent additions. Apply product approximately once each month at the rate of one pound of product to 12,000 gallons.

TEST CHLORINE LEVEL PRIOR TO RE-ENTRY. RE-ENTRY INTO TREATED SWIMMING POOLS IS PROHIBITED ABOVE LEVELS OF 3 PPM CHLORINE DUE TO RISK OF BODILY INJURY.

STORAGE AND DISPOSAL: Keep this product dry in original tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. If product becomes damp, discard, following instructions for contamination under Physical or Chemical Hazards. **CONTAINER DISPOSAL:** Rinse empty container thoroughly. Discard in trash. Do not reuse container.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS: DANGER: Corrosive: Causes irreversible eye damage. Do not breathe dust; may be harmful if inhaled. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin or on clothing. Causes skin irritation. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals. Wear protective eyewear (safety glasses). Wash thoroughly with soap and water after handling product. Remove contaminated clothing and wash clothing before reuse.

PHYSICAL OR CHEMICAL HAZARDS: CONTAINS OXIDIZING AGENTS. Do not mix with other chemicals or any other substance. DO NOT pre-dissolve or add water to this product. Always apply directly into the pool. Contamination of this product with small amounts of water or other substances may start a chemical reaction and generate heat, hazardous gas, possible fire and explosion. In case of contamination or decomposition, do not reseal container. Isolate container in open air or well-ventilated area. Flood container and area with large volumes of water. In case of spills, scoop up and place product in pool water, then flood spilled area with large volumes of water.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms.

NOTE: Buyer assumes all responsibility for safety and use not in accordance with directions.
