SWIMMING POOL ALGICIDE

BioGuard® has a wide variety of products that prevent specific pool situations. These products are designated as "Inhibit".

The BioGuard Care System has three important parts that help you maintain crystal blue sparkling water.

- A sanitizer to control bacteria
- A shock to destroy contaminants
- A preventative algicide to stop algae before it starts

All parts of the BioGuard Care System are vital to achieve beautiful water.

BioGuard Back-Up® is the preferred algae preventative for the BioGuard Care System. Weekly use of this product prevents algae before it starts. This product is formulated to complement most swimming pool sanitizers.

This product is a highly effective algae killer and algae preventative. The wetting agent in this product allows it to penetrate small crevices where algae are likely to form.

This product is effective and non-staining when used as directed. This product kills and prevents all types of algae; black algae, green algae, and mustard algae. This product will not evaporate and its algae fighting abilities actually increase as pool water temperature increases. This product provides a residual effectiveness that protects your pool against algae formation while keeping your pool water sparkling clear. This product protects the unattended pool when you're away (refer to "Vacation Treat" section in Directions For Use). This product may foam and therefore should not be used for spa treatment or in pools with attached spas, jetted returns, or water features.

Use this product weekly when using the BioLab UV system to prevent algae.

DIRECTIONS FOR USE: It is a violation of federal law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

Ensure all pool equipment is working properly. Clean or backwash filter following manufacturer's directions. Adjust pH to between 7.2-7.6. Adjust chlorine residual to 1-4 ppm. In a chlorinated pool, add stabilizer to establish a minimum stabilizer level of 30-40 ppm to reduce the degradative effects of sunlight upon the chlorine residual. Check for metals and if present add a stain and scale inhibitor to prevent staining of pool surface due to metals. Check chlorine residual and adjust to 1-4 ppm. When using other products as outlined in directions for this product, always follow directions on those products. Wait at least 15 minutes after application before entering pool.

(1) For maintenance: For initial application: Pour 32 fluid ounces directly into pool per 25,000 gallons of water (4ppm).

For routine maintenance: For weekly application intervals, pour 1 fluid ounce directly into pool per 5,000 gallons of water (0.5 ppm) weekly. For two week application intervals, pour 2 fluid ounces directly into pool per 5,000 gallons of water (1 ppm) every other week. Following heavy rain showers, add an additional 1 fluid ounce per 5,000 gallons of water.

To "vacation treat" (when away for one week or more): Add 4 fluid ounces of this product per 5,000 gallons (2 ppm) for every week unattended. Pour product around the edges of the shallow end of the pool if shock is also being used in the deep end of the pool.

(2) For algae treatment: For treatment of visible algae: Add one pound of BioGuard Maintain Burn Out Extreme® per 10,000 gallons of water, or one pound of BioGuard Maintain Burn Out® 35 per 6,000 gallons of water, or one pound of BioGuard Maintain Smart Shock® per 12,000 gallons of water. Follow application directions on these products. With pump and filter running, pour 32 fluid ounces of this product directly into pool per 25,000 gallons of water in areas of heaviest algae growth. Continuously circulate pool water for the next 24 hours. Afterwards, thoroughly brush pool surfaces. Prior to re-entry, test chlorine level. Do not re-enter pool until chlorine level is between 1 - 4 ppm. In cases of persistent algae, repeat brushing and product application after 2 - 4 days.

(3) For resistant algae treatment: For treatment of resistant algae: With pump and filter running, add five pounds of BioGuard Maintain Smart Shock per 12,000 gallons of pool water. Brush any undissolved product from pool surface. Follow application directions on BioGuard Maintain Smart Shock label. Wait 15 minutes, then pour 40 fluid ounces of this product directly into pool per 25,000 gallons of water (5 ppm) in areas of heaviest algae growth. Continuously circulate pool water for the next 24 hours. Afterwards, thoroughly brush pool surfaces. Prior to re-entry, test chlorine level. Do not re-enter pool until chlorine level is between 1 - 4 ppm. Chemically cleaning the filter is recommended 3 - 4 days after treatment.

DETERMINE POOL CAPACITY: Rectangular Pools - Length times width times average depth (in feet) times 7.5 equals gallons. **Round and Oval Pools** - Long diameter times short diameter times average depth (in feet) times 5.9 equals gallons.

STORAGE AND DISPOSAL: Keep this product in original tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. **CONTAINER DISPOSAL:** Non-refillable container. Do not reuse or refill this container. Offer for recycling if available. Triple rinse container (or equivalent) promptly after emptying.

PRECAUTIONARY STATEMENTS: HAZARDS TO HUMANS AND DOMESTIC ANIMALS: DANGER: Corrosive. Causes irreversible eye damage and skin burns. May be fatal if swallowed, absorbed through skin, or inhaled. Do not get in eyes, on skin or on clothing. Do not breathe vapor or spray mist. Wear protective eye-wear (goggles, face shield, or safety glasses), protective clothing and rubber gloves when handling this product. Wash thoroughly with soap and water after handling and before eating, drinking, or using tobacco. Remove contaminated clothing and wash before reuse.

FIRST AID: IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. **IF ON SKIN OR CLOTHING:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. **IF INHALED:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call poison control center or doctor for treatment advice. **IF SWALLOWED:** Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person. **Have the product container or label with you when calling a poison control center or doctor, or going for treatment. IN CASE OF MEDICAL EMERGENCY, CALL 1-877-800-5553. Note to Physician:** Probable mucosal damage may contraindicate the use of gastric lavage.

PHYSICAL OR CHEMICAL HAZARDS: Do not mix with other chemicals.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms.

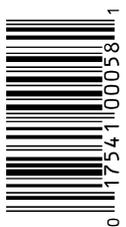

NOTE: Buyer assumes all responsibility for safety and use not in accordance with directions.
