# maintain power chlor™

compound action  
chlorinating granules

**TEST AND ADD\*\***

### Compound Action Formulation

- Sanitizes – kills bacteria
- Shocks – destroys swimmer contaminants
- Clarifies – clears water
- Algicide – kills algae

### With SunShield®

- Protects chlorine from sunlight, so you use less

### Easy Skimmer Application

For Use with All Pool Surfaces

| Sunlight Protector (SunShield®)   | Protects chlorine from sunlight dissipation          |

### SWIMMING POOL SANITIZER

BiGuard® has a wide variety of products that are required to maintain a high quality swimming environment. These products are designated as "Maintain".

This product is a compound action product:

- Sanitizes – to kill bacteria
- Shocks – to destroy swimmer contaminants
- Clarifies – to clear water
- Algicide – kills algae

Apply this product directly to the pool or through the skimmer per label directions. Routine use of this product provides pool owners crystal clear sparkling water. This product has SunShield that protects the chlorine active ingredient from degrading due to sunlight. This product can be used:

- As a routine sanitizer
- To shock
- To kill algae

**DIRECTIONS FOR USE:** It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. **READ ENTIRE LABEL AND USE STRICTLY IN ACCORDANCE WITH PRECAUTIONARY STATEMENTS AND DIRECTIONS FOR USE.**

Ensure all pool equipment is working properly. Clean or backwash filter following manufacturer's directions. Adjust pH to between 7.2–7.6. In chlorinated pools, add stabilizer to establish a minimum stabilizer level of 30–40 ppm to reduce the degradative effects of sunlight upon the chlorine residual. When using other products as outlined in the directions for this product, always follow directions on those products.

**APPLICATION METHOD:** DO NOT pre-dissolve this product before adding to pool or skimmer. DO NOT mix this product with any other products or chemicals. Always apply this product in its dry form using a clean dry plastic cup or scoop. Do not use this cup or scoop for any other purpose. This product should be applied through the skimmer or directly to pool as follows:

**Directly to Skimmer:** Add product in dry form directly through the skimmer with the basket removed and the pump operating. Replace the skimmer basket and keep the pump running for at least 2 to 4 hours.

**Directly to Pool:** Add product in dry form directly to the pool water by broadcast-

ing evenly across the surface of the pool, with the pump operating for at least 2 to 4 hours. If your pool has a bleachable surface, such as vinyl, colored plaster, painted or fiberglass, use skimmer application, or add directly to pool, brushing visible product until completely dissolved to avoid bleaching. If you have a vinyl liner and cannot see the bottom of your pool, apply this product directly to skimmer to avoid bleaching.

**INITIAL STARTUP:** Use this method if you are opening your pool in the spring, the pool has not been maintained for several weeks, or if the pool is freshly filled. Brush all pool surfaces with pump operating. Following the above **Application Method**, add 1 lb. (2, 8 oz cups) of this product in dry form per 10,000 gallons of pool water. After two hours, test chlorine level (residual). Repeat dosage until you obtain a chlorine level of 1–4 ppm.

**ROUTINE CHLORINATION:** Following the above **Application Method**, add 2 to 4 oz (1/4 to 1/2, 8 oz cup) of this product in dry form per 10,000 gallons of pool water every day, every other day or as often as needed to maintain a chlorine level between 1–4 ppm. The amount of product required and frequency of addition will vary with the number of swimmers, water temperature and amount of rain. Operate the pump a minimum of 10 hours per day for best results.

**SHOCK TREATMENT:** For best results, apply product weekly as part of your maintenance routine, or when bather loads are high, water appears hazy or dull, unpleasant odors or eye irritation occurs, or after heavy rain. Following the above **Application Method**, add 1 lb. (2, 8 oz cups) of this product in dry form per 10,000 gallons of pool water.

**ALGAE TREATMENT:** With pump operating, brush algae from pool surfaces. Following the above **Application Method**, add 1 lb. (2, 8 oz cups) of this product in dry form per 10,000 gallons of pool water for light algae growth. Add 2 lb. (4, 8 oz cups) of this product in dry form per 10,000 gallons of pool water for moderate to heavy algae growth. If necessary, repeat the treatment.

**Reentry into treated swimming pools is prohibited above levels of 4 ppm chlorine due to risk of bodily injury.**

**STORAGE AND DISPOSAL:** Keep this product dry in original tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. In case of decomposition, isolate container if possible and flood area with large amounts of water to dissolve all material before discarding this container. Keep area ventilated until all fumes are gone. Do not contaminate food or feed by storage or disposal. **CONTAINER DISPOSAL:** Non-refillable container. Do not reuse or refill this container. Offer for recycling, if available. Triple rinse container (or equivalent) promptly after emptying.

#### PRECAUTIONARY STATEMENTS:

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS:** DANGER: Corrosive. Causes irreversible eye damage. Causes skin burns. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin, or on clothing. Wear protective

eyewear (safety glasses), protective clothing and rubber gloves. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse.

**FIRST AID: IF INHALED:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call poison control center or doctor for treatment advice. **IF ON SKIN OR CLOTHING:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15–20 minutes. Call a poison control center or doctor for treatment advice. **IF IN EYES:** Hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. **IF SWALLOWED:** Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person. **IN CASE OF MEDICAL EMERGENCY, CALL 1-877-800-5553.**

**Note to Physician:** Probable mucosal damage may contraindicate the use of gastric lavage.

**PHYSICAL OR CHEMICAL HAZARDS:** CONTAINS AN OXIDIZING AGENT: DO NOT mix with other products or chemicals. Never add water to product. Always add product in dry form directly to pool or pool skimmer. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with organic matter or other chemicals will start a chemical reaction and generate heat, hazardous gas, possible fire, and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well-ventilated area. Flood area with large volumes of water.

**ENVIRONMENTAL HAZARDS:** This pesticide is toxic to fish and aquatic organisms. **NOTE:** Buyer assumes all responsibilities for safety and use not in accordance with directions.
