

Y-TEX® WARRIOR™

INSECTICIDE CATTLE EAR TAGS

- One tag per animal controls pyrethroid-resistant horn flies for 3 to 4 months and aids in control of face flies.
- One tag per animal controls biting and sucking lice during winter.
- No withdrawal time required.
- Two tags per animal control horn flies, lice, Gulf Coast and spinose ear ticks up to 5 months and aid in control of face flies, stable flies and house flies.
- Guaranteed against loss due to tag or button failure.*

GUARANTEE

*This guarantee is a limited guarantee, limited to the replacement of tags only, if the tags failed after being properly applied, to remain in the animal's ear for a five (5) month period due to tag breakage or separation from button.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Reformulation or repackaging of this product is prohibited. This labeling must be in the possession of the user at the time of pesticide application.

NOTE: When applying tags, wear chemical-resistant gloves made of rubber or any waterproof material (thickness equal to or greater than 14 mils).

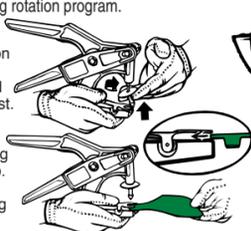

Summer Season: Apply 1 tag per animal to control horn flies for 3-4 months, control lice and aid in control of face flies. Apply 2 tags per animal (1 in each ear) for optimum control of horn flies, lice, Gulf Coast ticks and spinose ear ticks for up to 5 months. Two tags per animal also provides substantial reductions of face flies and aids in control of stable flies and house flies. Apply when pests appear.

Winter Season: Apply 1 new tag per animal in late fall to early winter to control biting and sucking lice. Kills biting lice and most sucking lice within 2 weeks. Protects from lice reinfestation for 2-3 months.

Apply new tags in spring for fly and tick control. Replace as necessary. Apply as shown with the Y-TEX 2-piece tagging system. All animals in the herd should be tagged. Calves less than 3 months of age should not be tagged or ear damage may result. To minimize development of insecticide resistance, remove used tags at end of fly and lice seasons and follow Y-TEX's recommended tag rotation program.

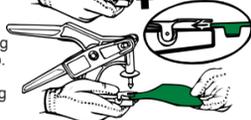

STEP 1

Seat male button firmly on pin, press down and give a slight twist.

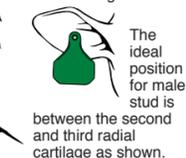

STEP 2

Place female tag firmly under clip. Collar on tag must be pointing away from pin.

STEP 3

Position applicator over ear and squeeze the handles together.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.
PESTICIDE STORAGE: Store in a cool place in original container away from direct sunlight. Opened bags containing ear tags should be resealed for storage.
PESTICIDE DISPOSAL: Remove tags before slaughter. Securely wrap used tags in a plastic bag and discard in trash.
CONTAINER DISPOSAL: Do not reuse bag. Discard bag in trash.

FIRST AID

This product contains diazinon and chlorpyrifos, organophosphate insecticides that inhibit cholinesterase.

If swallowed

- Call a poison control center or doctor immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by a poison control center or doctor.
- Do not give anything by mouth to an unconscious person.

If on skin or clothing

- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

If in eyes

- Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

If inhaled

- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth to mouth, if possible.
- Call a poison control center or doctor for treatment advice.

HOT LINE NUMBER

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-255-3924 for emergency medical treatment information.

NOTE TO PHYSICIAN

Diazinon and chlorpyrifos are organophosphate insecticides. If symptoms of cholinesterase inhibition are present, atropine sulfate by injection is antidotal. 2-PAM is also antidotal and may be administered, but only in conjunction with atropine.

CONTAINS **20** EAR TAGS

MADE IN USA
